involving the disintegration of metals and alloys into a dust of graphite and metal particles when exposed to a carburizing
atmosphere This important book reviews the factors affecting metal dusting and how it can be prevented in sectors such as
the chemical and petrochemical industries and in the direct reduction of iron ores It also considers the related corrosion
phenomena of carburization and nitridation After an introductory chapter setting out the key processes involved in metal
dusting the book reviews how this corrosion process affects a range of metals such as iron and steel as well as nickel based
and chromium based high temperature alloys There are chapters on the effects of particular gas mixtures on the corrosion
process and on the use of coatings to prevent metal dusting Processes involved in carburization and nitridation are also
described and discussed With its distinguished editors and team of contributors *Corrosion by carbon and nitrogen* is a
