Normore, Antonia Issa Lahera, 2018-09-01 Crossing the Bridge of the Digital Divide A Walk with Global Leaders explores the combined effect of the rapid growth of information as an increasingly fragmented information base a large component of which is available only to people with money and or acceptable institutional affiliations In the recent past the outcome of these challenges has been characterized as the digital divide between the information haves and have nots along racial and socio economic lines that seem to widen as time passes To address the issues of digital equity and digital inequality in an effort to bridge the digital divide educational scholars researchers and practitioners are in positions to ensure equitable opportunities are made available for people of all ages races ability sexual orientation and ethnicity in support of social justice for bridging the digital divide The digital divide addresses issues concerning equal opportunity equity and access that have an effect on the development of marginalized and otherwise disenfranchised populations within and across systems nationally and internationally The contributing authors representing United States Canada South Africa New Zealand and the UK posit that education institutions can serve as the bridge to close the digital divide for students who do not have access to information technology in their homes At a time when more computers are made available in schools than ever before the digital divide continues to widen and fewer people in the lowest SES groups are given the opportunity to join the world of computer technology and the internet As a result the influence of leadership activity on institutional racism gender discrimination inequality of opportunity inequity of educational processes digital exclusion and justice have gained currency and attention The contributing national and international authors examine the digital divide in terms of social justice leadership equity and access It is within this context that the authors offer discussions from a lens of their choice i e conceptual review of literature epistemological etc By adopting an educational approach to bridging the digital divide researchers and practitioners can connect and extend long established lines of conceptual and empirical inquiry aimed at improving organizational practices and thereby gain insights that might be otherwise overlooked or assumed This holds great promise for generating refining and testing theories of leadership for equity and access and helps strengthen already vibrant lines of inquiry on social justice
