Smith,2012 Decolonizing Grand Theories Sanjeev Kumar H.M.,2023-09-07

This book examines the modes by which the grand theories of International Relations can be restructured at the level of meta theory It emphasizes the inability of grand theories to make sense of international relations in postcolonial societies and argues to engage in such restructuring in the domain of ontology This is done by making a historical sociological defence toward adopting mid level theories in IR It is a critique of the meta theoretical foundations of Kenneth Waltz s grand theory of neorealism by pivoting itself upon the framework of postcolonial ontology Dwelling upon Mohammed Ayoob s mid level theory of subaltern realism it argues for undertaking the task of restructuring International Relations at the level of meta theory largely in the sphere of ontology It explains how the thrust of grand theories such as neorealism on ontological singularity can be circumvented Owing to this International Relations can experience a meta theoretical transformation that may manifest in the broader engagement of the discipline itself with the very conception of ontological multiplicity **A Global History of the Twentieth Century** Michael J. Green,Nicholas Szechenyi,2017-02-01 In this volume a distinguished group of scholars examine the national experiences of six major twentieth century powers the United States Japan Turkey China India and Germany to discern the centuries legacies for today and the lessons for tomorrow They explore core themes including anticolonialism democracy socialism nationalism industrialization nuclear weapons and globalization and provide

Germaine Tillion, Lucie Aubrac, and the Politics of Memories of the French Resistance Donald Reid, 2009-03-26

Germaine Tillion, Geneviève de Gaulle Anthoinet, Lucie Aubrac, and Raymond Aubrac were among a small number of French men and women who made the decision to resist early in the Occupation. In the summer of 1940, Marc Bloch analyzed the society in which he lived in order to identify and affirm allegiance to a France truly at odds with that which was taking shape in Vichy. Bloch died in the Resistance, but his life would take on new meanings in the collective memories of postwar France. Confrontation with the Aubracs' account of their refusal to accept the unacceptable became another important way the French engaged with the Resistance and its legacy. The acts Tillion took during the French Algerian War and de Gaulle Anthoinet took when confronted with poverty in the France of the thirties and forties were of a piece with the radical nature of their earlier decision to resist. Evocation of the Resistance provided a basis for France to reconstitute itself with honor after the war. Yet memory of the Resistance could also pose difficult issues for future generations. Those who came of age in 1968 grappled with the memory of the intrepid resisters of the first years of the war whose decision to resist stood as an inspiration and a challenge. Historians with the imperative to take the mandate to narrate the past from historical actors to make resisters figures of history developed complex relationships with those who had resisted. The essays in this collection address how resisters made sense of the wartime and postwar world in terms of their resistance and how others made sense of the Resistance itself and its legacy by engaging with resisters and their histories.
