Things A Story Of The Sixties A Man Asleep:

Things Georges Perec, 2009-12-01 *Things A Story of the Sixties* I is the story of a young couple who want to enjoy life but the only way they know how to do so is through ownership of things Perec's first novel won the Prix Renaudot and became the cult book for a generation In *A Man Asleep* a young student embarks upon a disturbing and exhaustive pursuit of indifference following his experience in non existence with relentless logic

Things Georges Perec, 1990 Two thematically related novellas by Georges Perec in one volume In each Perec probes our obsession with society's trappings the seductive mass of things that masquerade as stability and meaning In *Things A Story of the Sixties* Jerome and Sylvie a young upwardly mobile couple lust for the good life caught between the fantasy of the film they would have liked to live and the reality of life's daily mundanities The nameless student in *A Man Asleep* attempts to purify himself entirely of material desires and ambition He longs to want nothing Just to wait until there is nothing left to wait for Just to wander and to sleep Yearning to exist on neutral ground as a blessed parenthesis he discovers something unexpected With the American publication of *Life A User's Manual* in 1987 Georges Perec was recognized in the United States as one of this century's most innovative writers *Things A Story of the Sixties* is accessible sobering and deeply involving Each novel distills Perec's unerring grasp of the human condition and displays his rare comic talent detachment and compassion

Look Christian Madsbjerg, 2023-07-18 A powerful exploration of how we pay attention that will transform the ways we connect with one another at home at work and beyond Paying attention is a crucial human skill yet many of us have forgotten how to listen carefully and observe intentionally

Deluged by social media and hobbled by the increasing social isolation it fosters we need to rediscover the deeply human ways we connect with others Christian Madsbjerg a philosopher and entrepreneur understands this dilemma To counteract it he began a course at The New School in New York City called Human Observation which lays out the ways that we can learn to pay attention more effectively The course has been hugely popular since its inception with hundreds of students filling waiting lists In Look Madsbjerg sets out the key observational skills needed to show how we can recapture our ability to pay attention Drawing from philosophy science the visual arts and his own life he offers both practical insights and a range of tools for experiencing the world with greater richness and texture The result is a dynamic approach to rethinking observation that helps all of us to see with more empathy accuracy and connection to others [The Cambridge Companion to the Literature of Paris](#) Anna-Louise Milne,2013-08-01 No city more than Paris has had such a constant and deep association with the development of literary forms and cultural ideas The idea of the city as a space of literary self consciousness started to take hold in the sixteenth century By 1620 where this volume begins the first in a long line of extraordinary works of the human imagination in which the city represented itself to itself had begun to find form in print This collection follows that process through to the present day Beginning with the salon followed by the hybrid culture of libertinage and the revolutionary hotbeds of working class districts it explores the continuities and changes between the pre modern era and the nineteenth century when Paris asserted itself as cultural capital of Europe It goes on to explore how this vision of Paris as a key capital of modernity has shaped contemporary literature **The American Ascendancy** Michael H. Hunt,2007-04-10 A simple question lurks amid the considerable controversy created by recent U S policy what road did Americans travel to reach their current global preeminence Taking the long historical view Michael Hunt demonstrates that wealth confidence and leadership were key elements to America s ascent In an analytic narrative that illuminates the past rather than indulges in political triumphalism he provides crucial insights into the country s problematic place in the world today Hunt charts America s rise to global power from the nineteenth and early twentieth centuries to a culminating multilayered dominance achieved in the mid twentieth century that has led to unanticipated constraints and perplexities over the last several decades Themes that figure prominently in his account include the rise of the American state and a nationalist ideology and the domestic effects and international spread of consumer society He examines how the United States remade great power relations fashioned limits for the third world and shaped our current international economic and cultural order Hunt concludes by addressing current issues such as how durable American power really is and what options remain for America s future His provocative exploration will engage anyone concerned about the fate of our republic **Georges Perec's Geographies** Charles Forsdick,Andrew Leak ,Richard Phillips,2019-10-14 Georges Perec novelist filmmaker and essayist was one of the most inventive and original writers of the twentieth century A fascinating aspect of his work is its intrinsically geographical nature With major projects on space and place Perec s writing speaks to a variety of geographical urban and

architectural concerns both in a substantive way including a focus on cities streets homes and apartments and in a methodological way experimenting with methods of urban exploration and observation classification enumeration and taxonomy

Irish Housing Design 1950 - 1980 Brian Ward, Michael Pike, Gary Boyd, 2019-12-11 This book examines the architectural design of housing projects in Ireland from the mid twentieth century This period represented a high point in the construction of the Welfare State project where the idea that architecture could and should shape and define community and social life was not yet considered problematic Exploring a period when Ireland embraced the free market and the end of economic protectionism the book is a series of case studies supported by critical narratives Little known but of high quality the schemes presented in this volume are by architects whose designs helped determine future architectural thinking in Ireland and elsewhere Aimed at academics students and researchers the book is accompanied by new drawings and over 100 full colour images with the example studies demonstrating rich architectural responses to a shifting landscape

Useless Activity Christopher Webb, 2022-07-01 Using a broad range of archival material from Washington University St Louis the University of Glasgow and the British Library *Useless Activity* Work Leisure and British Avant Garde Fiction 1960 1975 is the first study to ask why the experimental writing of the 1960s and 1970s appears so fraught with anxiety about its own uselessness before suggesting that this very anxiety was symptomatic of a unique period in British literary history when traditional notions about literary work and what worked in terms of literature were being radically scrutinised and reassessed The study is divided into five chapters with three of those dedicated to the close analysis of work produced by three writers representative of the 1960s British avant garde Eva Figes 1932 2012 B S Johnson 1933 1973 and Alexander Trocchi 1925 1984 The book argues that these writers preoccupations with concepts related to work such as leisure debt and various forms of neglected labour like housework allow us to rethink the British avant garde s relation to realism while posing broader questions about the production and value of post war literary avant gardism more generally *Useless Activity* proposes that only with an understanding of the British avant garde s engagement with the idea of work and its various corollaries can we appreciate these writers move away from certain forms of literary realism and their contribution to the development of the modern British novel during the mid twentieth century

Henri Lefebvre on Space Lukasz Stanek, 2011 Shows how Lefebvre s theory of space developed out of direct engagement with architecture urbanism and urban sociology

The Age of New Waves James Tweedie, 2013-09-02 The Age of New Waves examines the origins of the concept of the new wave in 1950s France and the proliferation of new waves in world cinema over the past three decades The book suggests that youth cities and the construction of a global market have been the catalysts for the cinematic new waves of the past half century It begins by describing the enthusiastic engagement between French nouvelle vague filmmakers and a globalizing American cinema and culture during the modernization of France after World War II It then charts the growing and ultimately explosive disenchantment with the aftermath of that massive social economic and spatial

transformation in the late 1960s Subsequent chapters focus on films and visual culture from Taiwan and contemporary mainland China during the 1980s and 1990s and they link the recent propagation of new waves on the international film festival circuit to the economic miracles and consumer revolutions accompanying the process of globalization While it travels from France to East Asia the book follows the transnational movement of a particular model of cinema organized around mise en sc ne or the interaction of bodies objects and spaces within the frame rather than montage or narrative The master shot style of directors like Hou Hsiao Hsien Tsai Ming Liang and Jia Zhangke has reinvented a crucial but overlooked tendency in new wave film and this cinema of mise en sc ne has become a key aesthetic strategy for representing the changing relationships between people and the material world during the rise of a global market The final chapter considers the interaction between two of the most global phenomena in recent film history the transnational art cinema and Hollywood and it searches for traces of an American New Wave

The Pictorial Third Liliane Louvel, 2018-05-23 *The Pictorial Third* An Essay into Intermedial Criticism examines the extent to which poetry intertwines with painting and the visual at large and studies the singular relationship established between language and image observing the modalities and workings of what is termed intermedial transposition By following a critical method of the close analysis of texts the book examines to what extent the pictorial tool may be of help to analyze literary texts and thus enlarge and enrich literary criticism Examining the technical notions typical of the medium and its history including perspective framing colour anamorphosis trompe l il Veronica veil still life portrait figure illusion apparatus genres and styles this volume presents a pragmatics of image in text and of the visual in text as an operative tool This pictorial reading necessarily includes synesthesia and the senses it also functions as a reading event or what happens to one when one unawares encounters a picture be it present in the book or the object of an ekphrasis Thus the body is eventually given back a role to play The sensitive approach has its own resonances and the eye or the gaze sometimes sees double in such intermedially oriented texts This volume proposes to identify the pictorial third as the phenomenon which can be apprehended in terms of effect or affect not only as a concept

Afterlives of Georges Perec Rowan Wilken, 2017-03-08 Examines Perec's impact on architecture, art, design, media, electronic communications, computing, and the everyday. What do Perec's descriptions of the minutiae of everyday life reveal about our use of information and communications technologies? What happens if we read *Life A User's Manual* as a toolbox of ideas for games studies? What light does the concept of the *ainfra-ordinary* shed on social media? What insights does algorithmic writing generate for the digital humanities? What lessons can architects, artists, game designers, and writers draw from Perec's fascination with creative constraints? Through an examination of such questions, this collection takes Perec scholarship beyond its existing limits to offer new ways of rethinking our present.

On Design Tevfik Balcioglu, 2024-02-22 This volume presents for the first time a curated selection of essays written over the last 30 years by leading design thinker and educator Tevfik Balcioglu. With a focus on Turkish and British design, his writing examines questions of national and transnational design history and provides a critical insight into contemporary global design issues. Structured into four thematic sections with contextualizing introductions, this anthology addresses various aspects of design history, theory, education, and practice. Essays look at the impact of industrialization and globalization on design cultures and highlight local and global design developments from the late 20th century to the present day. They cover reproduction techniques and technological progress in recent decades, the changing nature of mass-produced objects, and the introduction of new methods, systems, shapes, forms, and styles over time. Addressing issues relating to education and practice, case studies draw on Balcioglu's work at various institutions such as Izmir University of Economics, Turkey, where he established a faculty of design departments and introduced a new model of integrated programmes, and Kent University, UK, where he established the BA Hons 3D Design course. His writing explores the nature and transferability of knowledge in the design field through critical analysis of the emergence of new degree programmes, the evolution of design education, and the relationship between theory and practice.
