The World the Railways Made Nicholas Faith, 2014-09-25 Across American prairies through Siberian tundra over Argentinian pampas and deep into the heart of Africa the modern world began with the arrival of the railway The shock was sudden and universal railways carried empire capitalism and industrialization to every corner of the planet For some the Iron Road symbolized the brute horrors of modernity for others the way toward a brighter future From 1825 when the first passenger service linked Stockton and Darlington to the outbreak of World War I Nicholas Faith presents an engaging and entertaining journey through the first century of rail introducing visionaries engineers surveyors speculators financiers and navvies the heroes and the rogues of the mechanical revolution that turned the world upside down The railway was the most important invention of the 19th Century and **THE WORLD THE RAILWAYS MADE** argues that in the 21st Century with high speed lines that can compete with air travel and over 190 metro systems in 54 countries underpinning the world's greatest cities it remains just as relevant

The Iron Road Christian Wolmar, 2014-05-01 The Iron Road is full of wondrous curiosities Did you know that early trains in Australia were pulled by convicts or that elephants were until recently used to shunt freight wagons in India The world's most magnificent railway station the Chhatrapati Shivaji terminal in Mumbai took 10 years to build The longest possible continuous railway journey in the world is the 10 600 miles between Algeciras in Spain and Ho Chi Minh City in Vietnam And the idea that Mussolini made the trains run on time is a myth No invention not even the Internet has ever transformed the way the world traveled worked thought fought ate drank made love you name it the way the train did From the historic moment in September 1830 when the first train chuffed between Liverpool and Manchester UK there was a race to lay down tracks across the planet Adventurers visionaries and rogues were attracted to grandiose projects linking distant corners of the globe in a quest for wealth power and national unity The achievements were heroic India's railway network was the biggest public works project since the building of the pyramids But the human costs were huge In the 1850s six thousand workers died during the construction of the Panama railway the world's first transcontinental line 120 for each mile of railroad The cadavers were pickled and sold to medical schools around the world to defray costs But for the shareholders there were fortunes to be made and at their peak the railroads represented luxury almost beyond belief The Iron Road tells of great invention grand vision mind boggling engineering military strategy colonial ambition groundbreaking trade changes and social impact all the ways that railroads utterly changed the world in which we live
