Jones,2010-10-26 In modern life we often hear people say things like Catholics don t believe in using birth control There are many reasons that we want to know what groups of people such as Catholics are thinking and doing But it s hard to understand which social situations are being described by such statements It s also difficult to understand what speakers believe when they make such statements even when the speakers are social scientists In this work cognitive scientist and philosopher Todd Jones looks at the different things that social scientists and ordinary speakers mean when they make statements ascribing beliefs or actions to groups rather than individuals Such statements are often denigrated as mere stereotypes or generalizations Yet they are also used by people to strategize about what actions to take and even for social scientific explanations In this work Jones takes a detailed look at the different things these kinds of statements about groups can mean and the various social structures they correspond to He also looks at how such statements can and can t be used to successfully explain the behavior of individuals or groups While many people broadly dismiss such statements about groups Jones gives a careful discussion of the problems and possibilities such statements have They Say My Kid's Gifted - Now

Alternation between L1 (Italian) and L2 (English) in Three CLIL and EMI Contexts (2nd Edition) Francesca Costa,2025-05-29 For years the alternation between the L1 and the L2 was banned in language classes since it was thought that this would impair the learning of the second language In recent years however there has been a recognition of the validity of alternation That is why this book aims at investigating the alternation of the L1 and L2 in Content and Language Integrated Learning CLIL and English Medium Instruction EMI contexts at three educational levels primary secondary tertiary in Italy To do so an overarching qualitative research approach was applied with both quantitative and qualitative elements The results of the study point at three main pedagogical implications which highlight the originality of this research The first implication is connected to the function of alternation between the L1 and the L2 Alternation played a mainly lexical role to explain specific lexis or at least to provide the students with lexis in both languages English and Italian The second implication highlights the fact that despite the contextual differences that exist the three educational levels primary

secondary and tertiary show a very similar use of alternation thereby pointing at similarities more than differences The third implication worth noting is the drive toward and preservation of multilingualism that comes from the use of alternation

Nunakun-gguq Ciutengqertut/They Say They Have Ears Through the Ground Ann Fienup-Riordan,2020-05-15 Lifeways in Southwest Alaska today remains inextricably bound to the seasonal cycles of sea and land Community members continue to hunt fish and make products from the life found in the rivers and sea Based on a wealth of oral histories collected over decades of research this book explores the ancestral relationship between Yup ik people and the natural world of Southwest Alaska Nunakun gguq Ciutengqertut studies the overlapping lives of the Yup ik with native plants animals and birds and traces how these relationships transform as more Yup ik people relocate to urban areas and with the changing environment The book will be hailed as a milestone work in the anthropological study of contemporary Alaska

Doing Mathematics: Convention, Subject, Calculation, Analogy (2nd Edition) Martin H Krieger,2015-01-15 Doing Mathematics discusses some ways mathematicians and mathematical physicists do their work and the subject matters they uncover and fashion The conventions they adopt the subject areas they delimit what they can prove and calculate about the physical world and the analogies they discover and employ all depend on the mathematics what will work out and what won't The cases studied include the central limit theorem of statistics the sound of the shape of a drum the connections between algebra and topology and the series of rigorous proofs of the stability of matter The many and varied solutions to the two dimensional Ising model of ferromagnetism make sense as a whole when they are seen in an analogy developed by Richard Dedekind in the 1880s to algebraicize Riemann's function theory by Robert Langlands program in number theory and representation theory and by the analogy between one dimensional quantum mechanics and two dimensional classical statistical mechanics In effect we begin to see an identity in a manifold presentation of profiles as the phenomenologists would say This second edition deepens the particular examples it describe the practical role of mathematical rigor it suggests what might be a mathematician's philosophy of mathematics and it shows how an ugly first proof or derivation embodies essential features only to be appreciated after many subsequent proofs Natural scientists and mathematicians trade physical models and abstract objects remaking them to suit their needs discovering new roles for them as in the recent case of the Painlevé transcendents the Tracy Widom distribution and Toeplitz determinants And mathematics has provided the models and analogies the ordinary language for describing the everyday world the structure of cities or God's infinitude
