Religions and the Global Rise of Civilizational Populism Ihsan Yilmaz, Nicholas Morison, 2023-01-12. This book explores the rise of civilizational populism throughout the world and its consequences. Civilizational populism posits that democracy ought to be based upon enacting the people's will, yet it adds a new and troubling dimension to populism's thin ideology: a civilization-based classification of peoples and division of society. Today we increasingly find not conflict between civilizations but conflict within states over their civilizational identity. From Western Europe to Turkey and from India and Pakistan to Indonesia, populists are increasingly employing a civilization-based classification of peoples in order to define the identities of the people and their perceived enemies. This book is the first to examine civilizational populism as a global phenomenon rather than a uniquely Western form of politics. Through a series of case studies, the book examines the role played by religion in forming civilizational identities but also investigates the often deleterious consequences of civilizational populism entering the political mainstream.

US Narratives of Nuclear Terrorism Since 9/11 David Seed, 2019-04-06. This study examines the US fiction and related films which make a series of interventions in the cultural debate over the threat of nuclear terrorism. It traces the beginnings of this anxiety from the 1970s, which increased during the 1990s after the collapse of the Soviet Union. The traumatic events of 9/11 became a major reference point for this fiction which expressed the fear that of a second and worse 9/11. The study examines narratives of conspiracies which are detected and forestalled and of others which lead to the worst of all outcomes: nuclear detonations, sometimes delivered by suitcase nukes. In some of these narratives, the very fate of the nation hangs in the balance in the face of nuclear apocalypse. The discussion considers cases of attacks by electromagnetic pulse (EMP), cyberterrorism, and even bioterrorism. Some of the authors examined are present or former politicians, members of the CIA, and former president Bill Clinton.
