The Liar In Your Life The Way To Truthful Relationships:

The Liar in Your Life Robert Feldman, 2009-08-03 In *The Liar in Your Life* psychology professor Robert Feldman one of the world's leading authorities on deception draws on his immense body of knowledge to give fresh insights into how and why we lie how our culture has become increasingly tolerant of deception the cost it exacts on us and what to do about it His work is at once surprising and sobering full of corrections for common myths and explanations of pervasive oversimplifications Feldman examines marital infidelity little white lies career driven resum lies and how we teach children to lie Along the way he reveals despite our beliefs to the contrary how it is nearly impossible to spot a liar studies have shown no relationship between nervousness lack of eye contact or a trembling voice and acts of deception He also provides startling evidence of just how integral lying is to our culture indeed his research shows that two people meeting for the first time will lie to each other an average of three times in the first ten minutes of a conversation Feldman uses this discussion of deception to explore ways we can cope with infidelity betrayal and mistrust in our friends and family He also describes the lies we tell ourselves Sometimes the liar in your life is the person you see in the mirror With incisive clarity and wry wit Feldman has written a truthful book for anyone whose life has been touched by deception

Trust Rules Linda K. Stroh, 2015-09-09 Trust is at the root of all positive relationships This accessible and empowering book teaches how to form an inner circle of trusted confidants in your workplace and at home that will allow you to live a more peaceful and more effective life reduce stress and better deal with negative emotions Building trust is crucial for effective leadership and trusting others is a necessary part of working with others But knowing whom to trust and whom not to trust eludes many people A surprising number of people report that being betrayed by someone in their inner circle either at work or in their personal lives is one of the most devastating things they have endured Lack of trust is also expensive in that it costs companies money to surveil employees and in our personal lives if we live with people we cannot trust we expend needless amounts of energy protecting ourselves from these untrustworthy people How do we increase trust bounce back from betrayal and form alliances and positive relationships with those who ARE trustworthy This book provides a unique examination of trust and its often overlooked importance to our work and personal lives It identifies the characteristics of a trusting relationship considers the

decision making process that people should make before granting individuals admission to their own inner circle and teaches how to tell the good guys from the bad guys in our work environments and life in general This revised and updated edition contains new information on the negative mental and physical aspects of telling lies how to better manage our emotions which allows us to become better guys ourselves strategies for building more trusting relationships in our families and how trust works and doesn't work online in the Internet age It also includes a useful Family Board Meeting tool for having family meetings in a way that encourages honest and open dialogue between family members regardless of age or family structure

Just Trust Me G. Randy Kasten, 2012-12-13 SUVs are the safest vehicle because they're so large right Wrong That's the advertising pitch but in 2000 they had the highest rollover rate 36% of any vehicle type involved in fatal accidents Yet two years later their safety myth was still so strong that one of four vehicles sold in the U S was an SUV The world of spin we live in is full of such potentially hazardous illusions We need to know if particular foods can hurt us with Salmonella or cholesterol whether our government is truthful in its reasons for waging war what problems a political candidate may cause or resolve if elected and whether the items we purchase are durable or junk But gaining those insights can be challenging when so many of the illusions surrounding us are deliberately created As a civil litigation attorney for over twenty five years Randy Kasten has heard thousands of lies He has witnessed that those who dispense the information we need to make decisions advertisers salespeople politicians and the media often have a vested interest in manipulating us Truth's biggest enemies are the people whose job it is to sell us incomplete versions of the facts and our willingness to believe what we want to believe Often we believe what we believe because it is the only story available To help us see through deceptions of all types Kasten discusses eight kinds of lies and what we can do about them as well as methods for discerning the truth gleaned from his practice of law Other topics include advertising magic thirty six places where the truth hides lessons from science the media and misinformation and how we fool ourselves Altogether he provides a unique tool for enabling us to make decisions that will lead to more prosperity better health greater intimacy and a life based on lasting values

House of Lies Dr. Cristina Guarneri, 2017-02-27 Political lies have not only an ethical nature but it also damages the democratic health of both the people and the politician that represents them In order for politics to be able to represent the people it must have the ability to instill confidence in the people We see that just the opposite is occurring We call such inner workings a formula to the political salesman or the House of Lies It is honesty loyalty integrity maintaining excellent behavior austerity and the ability
