

The South African reality about student success in undergraduate programmes

- Only about one in four students in contact institutions (that is, excluding UNISA) graduate in regulation time (for example, three years for a three-year degree).
- Only 35% of the total intake, and 48% of contact students, graduate within five years.
- When allowance is made for students taking longer than five years to graduate or returning to the system after dropping out, it is estimated that some 55% of the intake will never graduate.
- Access, success and completion rates continue to be racially skewed, with white completion rates being on average 50% higher than African rates.
- The net result of the disparities in access and success is that under 5% of African and coloured youth are succeeding in any form of higher education.
