REGISTERED NURSES RNS ARE highly respected professionals that form the backbone of healthcare Without a strong workforce of RNs the daily operations of healthcare would quickly grind to a halt Few careers offer such challenging yet rewarding work Every time RNs go to work they make a difference in people s lives or even save lives of newborns the elderly and everyone in between As key members of the healthcare team they perform a wide variety of tasks such as administer medications assist with surgery help people cope with long term illness and provide health education They also take care of patients in their homes as they recover from illness surgery or accidents RNs power the healthcare system ensuring that the many details involved in patient care flow smoothly This includes much more than direct patient care and RNs are not confined to the bedside Today s RNs handle case management conduct clinical research and teach in nursing programs They also influence legislation establish new healthcare delivery systems write and publish and participate on boards of directors They often supervise licensed practical nurses LPNs and nursing assistants A registered nursing career also offers many opportunities to specialize in one or more areas of patient care There are more than 100 specialties to choose from such as surgical pediatrics oncology emergency medicine geriatrics orthopedics or rehabilitation There are

three routes to becoming a registered nurse The shortest and most popular is a two year nursing program known as an AND Although two years is not much time to invest in such a solid career it is not easy to accomplish This is a popular field and there is competition to get into nursing schools Once admitted students have to work hard to make it through the rigorous curriculum Will there be a job waiting for those who manage to get trained and licensed Registered nurses are everywhere and there are a growing number of working professionals There are three million registered nurses in the US which makes it the largest group of healthcare workers Yet that is not enough to fill the need There has been a nursing shortage for decades and the job growth rate for RNs continues to be much higher than for most other occupations The high demand means a newly graduated registered nurse will have the opportunity to work practically anywhere Employers are offering good pay as much as 70 000 a year even for those with less than a year of experience That does not even include sign on bonuses benefits and other perks With advanced training some nursing specialties pay over 200 000 a year A career in registered nursing offers a winning combination of job security ease of entry flexible work hours good pay and the opportunity to help others It is also challenging defined by hard work long hours and stressful situations For the right type of person however there is no more rewarding career than being a registered nurse
