

Unit 2: Development, Environment, and Personality

Unit Overview	
Psychology was born as scientists discovered different patterns. These patterns have been influenced by the understanding of psychology. Psychologists study other biological, cognitive, and emotional responses to understand the underlying biological differences. There are many ways to study psychology, including experimental, observational, and survey methods. Each method has its own strengths and weaknesses. The study of psychology includes the study of behavior, thought, and emotion. It also includes the study of the biological basis of behavior, thought, and emotion. The study of psychology is a broad field that includes many different areas of research.
