Marketers play a crucial role in generating revenue and they can play an equally important role in how revenues translate into profit. They can help a company achieve growth by being smarter or more efficient than its competitors and do so in a sustainable way. Marketers have their ear to the ground and therefore are often the first to pick up on changing customer needs and behavior and the forces at play in markets. This informs the development and improvement of products, processes and standard of service. The book explores how to identify the most valuable customers, the most effective ways to drive revenue growth and the best ways to improve profitability. It combines insight and practical guidance and is supported by a wealth of hard data and anecdotal evidence from a wide range of business in Britain, America, Europe and Asia including Amazon, China Mobile, Dove, Goldman Sachs, Haier, ING Direct, Lenovo, Mini, Procter Gamble, Red Bull, Target, Twitter, Virgin and Zara.

Managing Brands Alexander Chernev, Brands are one of the company's most valuable assets. Brands benefit customers by creating value that goes beyond the product and service aspects of the offering. By bolstering customer demand, brands enable the company to capture greater value from its customers while at the same time strengthening the impact of the other marketing tactics, ensuring greater collaborator support and facilitating the hiring and retaining of skilled employees. The key aspects of creating and managing brands are the focus of this note. The discussion of brand management is complemented by an in-depth overview of two additional topics: the role of brands as a means of self-expression and luxury branding. This note is an excerpt Chapter 11 from *Strategic Marketing Management: Theory and Practice* by Alexander Chernev, Cerebellum Press, 2019.

Automotive FDI in Emerging Europe A. J. Jacobs, 2017-06-19. This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland and Slovakia from 1989 onwards. Enticed by relatively lower wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015 and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy makers in Europe in relation to their pursuits of FDI and will be of great interest to scholars and students of business, economic history, political science and development.

Magic, Culture and the New Economy Robert Willim, Orvar Löfgren, 2020-09-08. What happens when economies heat up? This book looks at the 1990s years of intense economic experimentation when buzz words such as network society, the experience economy, creative cities and glocalization were everywhere. A fascinating perspective on The New Economy emerges as the authors explore the worlds of coolhunters, biotech brokers, career coaches, software entrepreneurs and event managers and tackle such questions as how is magic used in the quest for newness and change, what happens when cultural techniques such as branding and styling

colonize new arenas what turns out to be just a flash in the pan and what has a lasting impact This book is essential reading for anyone wishing to understand how economies operate in periods of rapid transformation
