Invisible Agents Nadine Akkerman, 2018-06-28 It would be easy for the modern reader to conclude that women had no place in the world of early modern espionage with a few seventeenth century women spies identified and then relegated to the footnotes of history If even the espionage carried out by Susan Hyde sister of Edward Hyde Earl of Clarendon during the turbulent decades of civil strife in Britain can escape the historiographer's gaze then how many more like her lurk in the archives Nadine Akkerman's search for an answer to this question has led to the writing of **Invisible Agents** the very first study to analyse the role of early modern women spies demonstrating that the allegedly male world of the spy was more than merely infiltrated by women This compelling and ground breaking contribution to the history of espionage details a series of case studies in which women from playwright to postmistress from lady in waiting to laundry woman acted as spies sourcing and passing on confidential information on account of political and religious convictions or to obtain money or power The struggle of these women to construct credibility in their own time is mirrored in their invisibility in modern historiography Akkerman has immersed herself in archives libraries and private collections transcribing hundreds of letters breaking cipher codes and their keys studying invisible inks and interpreting riddles acting as a modern day spymistress to unearth plots and conspiracies that have long remained hidden by history

Women, Science and Medicine 1500-1700 Lynette Hunter,Sarah Hutton,1997 In this work a group of international scholars attempt to make women visible in the history of science by rethinking the history of science itself Modern definitions of science have tended to exclude women s actual contributions particularly in discussions of the Renaissance which does not offer a model of enquiry equivalent to modern science However during the period 1500 1700 women were making a substantial contribution to the development of natural philosophy a field which included science medicine technology and the history of ideas Women from all parts of society worked both on their own and alongside men in a broad general practice of science and medicine that is reflected in their literary writings their technical handbooks and the few books of science and philosophy which they left The essays collected here are cross disciplinary in approach and offer fresh research into the social and intellectual contexts for science as the English Renaissance moved from the formation of Gresham College in 1597 to the inauguration of the Royal Society in 1662
