Unisa May June Examination Papers 2015:

The Unresolved National Question in South Africa Edward Webster, Karin Pampallis, John Mawbey, Jeremy Cronin, 2017-03-01 This volume examines the way in which various strands of left thought have addressed the National Question The re emergence of debates on the decolonisation of knowledge has revived interest in the National Question which began over a century ago and remains unresolved Tensions that were suppressed and hidden in the past are now being openly debated Despite this the goal of one united nation living prosperously under a constitutional democracy remains elusive This edited volume examines the way in which various strands of left thought have addressed the National Question especially during the apartheid years and goes on to discuss its relevance for South Africa today and in the future Instead of imposing a particular understanding of the National Question the editors identified a number of political traditions and allowed contributors the freedom to define the question as they believed appropriate in other words to explain what they thought was the Unresolved National Question This has resulted in a rich tapestry of interweaving perceptions The volume is structured in two parts The first examines four foundational traditions Marxism Leninism the Colonialism of a Special Type thesis the Congress tradition the Trotskyist tradition and Africanism The second part explores the various shifts in the debate from the 1960s onwards and includes chapters on Afrikaner nationalism ethnic issues black consciousness feminism workerism and constitutionalism The editors hope that by revisiting the debates not popularly known among the scholarly mainstream this volume will become a catalyst for an enriched debate on our identity and our future Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience **Educating Generation Next** Lucas Walsh, 2016-01-26 Is the current industrial model of schooling capable of preparing young people for modern working life This book provides an unsettling picture of the challenges young people face following the uncertainty of the Global Financial Crisis It asks whether teachers and schooling are able to provide the skills needed in a contemporary global economy Yearbook of International Organizations 2014-2015 (Volume 4) Union Of International Associations, Union of International Associations, 2014-09-17 The Yearbook of International Organizations provides the most extensive coverage of non profit international organizations

inequalities poverty rising unemployment and cultural hegemony as they continue to frame curricula cultures and practices The book contemplates the project of undoing cognitive damage offering glimpses to redesign curriculum in the 21st century The contributors international scholars emergent and expert researchers include different nationalities orientations and positionalities constituting an interdisciplinary ensemble which collectively provides a rich commentary on higher education curriculum as we know it and where we think it could be in the future The edited volume is a catalytic tool for disrupting canonised rituals of practice in higher education It has been a while since a scholarly book so authoritative in its claims and innovative in its concepts threatens to shake up the curriculum field at its foundations Rich in metaphor and meaning the superbly written chapters challenge a field that once more became moribund as we settled so far too comfortably into accepting handed down frames and fictions about knowledge authority power and agency that imprint cognitive damage on those forced to the margins of schools and universities Disrupting Higher Education Curriculum demonstrates however that it is in fact from those margins of the education enterprise that academics teachers and learners can see more clearly how patterns of thought and action hold us back from placing and experiencing our African humanity at the centre of the curriculum Jonathan Jansen Rector and Vice Chancellor of the University of the Free State South Africa **A**
