Corrupted Jonathan D Jansen, 2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict Corrupted takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich

concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly

Media Diversity in South Africa Julie Reid, 2021-12-30 This timely book argues that the Global North's research methods and traditional assumptions are not valid to the media landscapes and audiences of the Global South With South Africa as the focus the authors offer a new understanding of media diversity along an audience centred approach Disappointingly research shows that most South African citizens most of whom are economically marginalised are found to experience extremely low levels of media content diversity in their personal media diets The contributing factors are inter related and complex but include the inequitable distribution of media content a lack of African language media and most especially the cost of media access which is unaffordable to many In this book the authors examine what went wrong with post apartheid attempts to democratise the media landscape and why the experienced levels of media diversity by the majority South African audience

remain so woefully low While media diversity is usually measured by policymakers sector stakeholders or by market related imperatives this book foregrounds the perspective of the media consumer In doing so traditional media measuring is inverted leading to a more in depth understanding of how ordinary people in the Global South receive media content how much and why The authors offer a holistic analysis of the ineffectuality of key media policymaking processes projects and institutions while also suggesting how these could be transformed to create a more diverse and broadly accessible media landscape

Knowledge and Change in African Universities Michael Cross, amasa ndofirepi, 2017-01-28 Besides the ongoing concern with the epistemological and theoretical hegemony of the West in African academic practice the book aims at understanding how knowledge is produced and controlled through the interplay of the politics of knowledge and current intellectual discourses in universities in Africa In this regard the book calls for African universities to relocate from the position of object to subject in order to gain a form of liberated epistemological voice more responsive to the social and economic complexities of the continent In itself this is a critical expos of contemporary practices in knowledge advancement in the continent Broadly the book addresses the following questions How can African universities reinvent knowledge production and dissemination in the face of the dominant Eurocentricism so pervasive and characteristic of academic practice in Africa to enhance their relevance to the contexts in which they operate How can such change particularly at knowledge production and distribution levels be undertaken without falling into an intellectual and discursive ghettoization in the global context What then is the role of academics policy makers and curriculum and program designers in dealing with biases and distortions to integrate policies knowledge and pedagogy that reflect current cultural diversity both local and global Against this backdrop while some contributions in this book argue that emancipatory epistemic voice in African universities is not yet born or it is struggling with little success many dissenting voices charge that if Africans do not take responsibility and construct knowledge strategies for their own emancipation who will Chinese Organizations in Sub-Saharan Africa Terence Jackson, Lynette Louw, Dev K. Boojihawon, 2020-11-09 Trade between China and Africa is increasing year on year while the West increasingly debates the nature and implications of China's presence Yet little research exists at the organizational and community levels While western press reporting is overwhelmingly negative African governments mostly welcome the Chinese presence But what happens at the management level How are Chinese organizations run What are they bringing to communities What is their impact on the local job market How do they manage staff How are they working with local firms This book seeks to provide a theoretical framework for understanding Chinese organizations and management in Africa and to explore how their interventions are playing out at the organizational and community levels in sub Saharan Africa Based on rigorous empirical research exploring emerging themes in specific African countries this book develops implications for management knowledge education and training provision and policy formulation Importantly it seeks to inform future scholarship on China's management impact in the world generally on Africa's future

development and on international and cross cultural management scholarship Primarily aimed at scholars of international management with an interest in China and or in China in Africa this important book will also be of great interest to those working in the area of development studies international politics and international relations **Models for Solid Oxide Fuel Cell Systems** Dario Marra,Cesare Pianese,Pierpaolo Polverino,Marco Sorrentino,2016-03-07 This book presents methodologies suitable for the optimal design of control and diagnosis strategies for Solid Oxide Fuel Cell SOFC systems One key feature of the methodologies presented is the use of modeling tools with an ideal balance between accuracy and computational burden Particular emphasis is given to the useful combination of models within a hierarchical framework to reduce the experimental efforts required for characterization and testing Such tools are proven to be highly effective for SOFC systems destined for both residential and transportation applications Throughout the book optimization is always conceived in such a way so as to allow the SOFC systems to work efficiently while guaranteeing safe thermal operation as well as an extended lifetime This book is aimed at scientists and engineers involved in the design of marketable SOFC systems It gathers the knowledge and experience derived from other research and industry practice for which control and diagnosis have proven to be the main keys to success and market penetration **African Philosophy and Environmental Conservation** Jonathan Chimakonam,2017-10-04 African Philosophy and Environmental Conservation is about the unconcern for and marginalisation of the environment in African philosophy The issue of the environment is still very much neglected by governments corporate bodies academics and specifically philosophers in the sub Saharan Africa The entrenched traditional world views which give a place of privilege to one thing over the other as for example men over women is the same attitude that privileges humans over the environment This culturally embedded orientation makes it difficult for stake holders in Africa to identify and confront the modern day challenges posed by the neglect of the environment In a continent where deep rooted cultural and religious practices as well as widespread ignorance determine human conduct towards the environment it becomes difficult to curtail much less overcome the threats to our environment It shows that to a large extent the African cultural privileging of men over women and of humans over the environment somewhat exacerbates and makes the environmental crisis on the continent intractable For example it raises the challenging puzzle as to why women in Africa are the ones to plant the trees and men are the ones to fell them Contributors address these salient issues from both theoretical and practical perspectives demonstrating what African philosophy could do to ameliorate the marginalisation which the theme of environment suffers on the continent Philosophy is supposed to teach us how to lead the good life in all its forms why is it failing in this duty in Africa specifically where the issue of environment is concerned This book which trail blazes the field of African Philosophy and Environmental Ethics will be of great interest to students and scholars of Philosophy African philosophy Environmental Ethics and Gender Studies *ECKM 2020 21st European Conference on Knowledge Management* Professor Alexeis Garcia-Perez,2020-12-02 **Human Resources for**

the Non-HR Manager Carol T. Kulik, Elissa L. Perry, 2023-05-02 Human Resources for the Non HR Manager gives every manager regardless of their functional role access to cutting edge research and evidence based recommendations so they can approach their people management responsibilities with confidence Day to day people management is increasingly the responsibility of front line managers not HR professionals But managers are often poorly prepared for these responsibilities they receive little training and sometimes have little interest in HR People management is never easy and it is particularly challenging in COVID 19 s next normal workplace where managers must engage diverse employees across a wide range of working arrangements This book focuses on the special relationship that line managers have with their employees and describes managers responsibilities across the entire employee lifecycle from front end recruiting and hiring through to long term retention The content is grounded in rigorous academic research but the book s conversational tone conveys basic principles without technical jargon Each chapter includes Manager s Checkpoints to help readers apply the material to their own workplace and Manager s Knots that address gray areas inherent in people management The book is designed for any reader currently working as a line manager or aspiring to a managerial role who wants to improve their people management skills Combined with a complete instructor package the book provides different types of activities to accompany each chapter Some Assembly Required In the News and Undercover Manager The activities can be found in the Instructor Resources Download Hub and are designed to align with student cohorts with varying levels of experience

Deanship in the Global South Oliver J.J. Seale, 2021-02-08 The university today is a postmodern neo liberal competitive boundary less knowledge conglomerate a far cry from its historical traditional classical and collegial roots There is a body of literature on deanship that points to its evolving nature in the contemporary academe characterised by complexity and change Balancing academic demands simultaneously with the requirements for effective performance leadership and management lies at the heart of this very challenging bridging role nowadays Deans are generally former academics emerging from a traditional collegial space and often catapulted into the relatively unknown domain of executive management with its related problems Deans nowadays are required to be more than collegial intellectual leaders They are also meant to be fiscal and human resource experts fundraisers politicians and diplomats Deanship in the Global South Bridging Troubled Waters is about the deans lived reality as they try to balance the demands of both the academe from which they emerge and the administration to whom they now need to account Their lack of preparation and inadequate support points to the need for a more strategic integrated approach to leadership development within their critical bridging roles between the academe and administration
