[Reader's Guide to Periodical Literature Supplement](#), 1919 **Qualitative Content Analysis in Practice** Margrit Schreier, 2012-02-21 Qualitative content analysis is a powerful method for analyzing large amounts of qualitative data collected through interviews or focus groups. It is frequently employed by students, but introductory textbooks on content analysis have largely focused on the quantitative version of the method. In one of the first to focus on qualitative content analysis, Margrit Schreier takes students step by step through creating a coding frame, segmenting the material, trying out the coding frame, evaluating the trial coding, carrying out the main coding, what comes after qualitative content analysis, making use of software when conducting qualitative content analysis. Each part of the process is described in detail, and research examples are provided to illustrate each step. Frequently asked questions are answered; the most important points are summarized; and end-of-chapter questions provide an opportunity to revise these points. After reading the book, students are fully equipped to conduct their own qualitative content analysis. Designed for upper-level undergraduate, MA, PhD students, and researchers across the social sciences, this is essential reading for all those who want to use qualitative content analysis.
