Echoes of Success: Identity and the Highland Regiments Ian Stuart Kelly,2015-03-31 In Echoes of Success Ian Stuart Kelly uses new information about late Victorian Scottish Highland battalions to provide new insights into how groups identify

themselves and pass that sense on to successive generations of soldiers Kelly applies concepts from organisational theory the study of how organisations function to demonstrate how soldiers experiences create a blueprint of expected behaviours and thought patterns that contribute to their battalion s continued success This model manages the interplay between public perception and actual life experiences more effectively than current approaches to understanding identity Also Kelly s primary research offers a more certain description of soldiers life faith education and discipline than has previously been available

Uncovering the Unconscious Dimensions of Planning Frank Othengrafen,2016-02-17 If planning is understood to be about the nature of place about the way in which we use land and about the physical expression of the ordering of society then it becomes apparent that planning as an activity cannot possibly be divorced from the general cultural traditions that inform it By adopting theoretical approaches from the fields of management studies cultural studies and anthropology and by using culture as an organising principle this book develops an innovative framework which provides better insights into what culture is about what the relations are between culture and planning and how culture influences planning practices It introduces a culturised planning model consisting of the analytical dimensions planning artefacts planning environment and societal environment with which to discover the unconscious routines and assumptions emotions and meanings attached to planning systems and the different concepts used in spatial planning systematically The model offers the possibility of uncovering cultural phenomena in spatial planning by providing relevant cultural dimensions and potential specifications and indicators which has not been the case so far By comparing examples of German Finnish and Greek planning habits the book illustrates cultural influence in planning and provides the readership with a feedback between the micro experiences of planners and the macro level institutional and social context as well as a more systematic comparison based on cultural values attitudes norms and rules

Drowning by Accident Elizabeth Meinhard,2022-02-15 Drowning By Accident explains why it is so easy to drown where accidents happen and how to save lives by early rescue and resuscitation More than 600 people die by drowning in Britain every year Swimming is promoted as a particularly safe form of exercise so that swimmers forget or ignore the dangers of frigid lakes swollen rivers incoming tides or outgoing rip currents Drowning accidents take place because we don t recognise water as a hostile environment We overestimate the strength and endurance of our bodies and underestimate the power and deceptiveness of water Year after year victims lose their lives in typical drowning accidents often sinking so quickly and silently that nearby family friends and onlookers fail to notice the tragedy taking place close beside them Babies drown in baths Toddlers drown in garden ponds School children fall off rafts Teenagers strike too far from the shore Pensioners wade into rivers to save their dogs Victims often die within minutes of sinking beneath the surface A quarter of those who reach hospital alive will also die while others survive with severe permanent brain damage This means that it is vitally important for parents grandparents teachers lifeguards and lawmakers to recognise the risks and prevent drowning accidents before they take place
