The Insect Folk Margaret Warner Morley,1903 **The Insect Folk** Margaret Warner Morley,2015-12-27 Margaret Warner Morley February 17 1858 in Montrose Iowa December 12 1923 in Washington D C was an American educator biologist and writer author of many books on nature and biology for children and novel writer Excerpt When the dragon fly larva first hatches it is very small and its legs are rather long and spidery but it eats and eats and eats my how it eats And it grows and grows and one day it finds its skin too tight A tight skin must be rather uncomfortable But the larva does not care much for its skin It merely splits it open down the back and pulls itself out Perhaps you think it must be yet more uncomfortable to be without a skin But it is not without a skin It is covered by a new and soft one that soon hardens and that is larger than the old one It wriggles out of its old skin as though it were an old coat and leaves it clinging to the weeds in the pond Sometime you may find these cast off dragon fly overcoats After it has shed its skin the dragon fly continues to grow Excerpt from Wikipedia [The Insect Folk](#) Warner Margaret Morley,2009-01-01 A dialogue about insects between the author and some children **The Insect Folk** Margaret Warner Morley,2020-03-28 DEAR CHILDREN The very best way to know the insects is to go and watch them Watch them whenever you can and each time you will find out something new Books will help you but you must watch too Look more than you read If you need to catch them put them under a tumbler and feed them and give them a drop of water every day to drink Slip a card under the rim of the tumbler on one side so as to let in the air If you do not know what to feed them or if they will not eat let them go after a day or two If you wish to kill an injurious insect do it quickly and completely Remember the insects are alive and we should not make them suffer unnecessarily Of course you must try to make your captives feel at home If they live in the sand put sand in the tumbler and tie a piece of netting over the top so they cannot escape If they live in the water put them in a tumbler of water And when you have secured your captives watch them as much as you can If you do not know how to pronounce the words in this book study the glossary at the back and it will help you I hope you will have a very happy time getting acquainted with your little insect neighbors MARGARET WARNER MORLEY [The Insect Folk](#) Margaret Morley,2025-12-18 *Butterflies and Bees* ,

in this respect It gets its name from its habit of squirting an offensive fluid upon any one who disturbs it This fluid when coming in contact with the air quickly vaporizes and looks like smoke This queer little gun is used presumes to attack the well armed brigadier who thus bombards the enemy Yes Mollie I am sure you have often seen these queer fellows The Water Beetle Not all the insects that dart about our ponds belong to the Bug Order There are water beetles as well as water bugs You can tell which are beetles and which are bugs by their mouth parts The The Insect Folk - Scholar's Choice Edition Margaret Warner Morley,2015-02-17 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant *Insect Folk at Home* William J. Claxton,1923 **The Insect Epiphany** Barrett Klein,2024-10-15 From entomologist Barrett Klein comes a buzz worthy exploration of the many ways insects have affected human society history and culture Insects surround us They fuel life on Earth through their roles as pollinators predators and prey but rarely do we consider the outsize influence they have had on our culture and civilization Their anatomy and habits inform how we live work create art and innovate Featuring nearly 250 color images from ancient etchings to avant garde art from bug based meals to haute couture The Insect Epiphany proves that our world would look very different without insects not just because they are crucial to our ecosystems but because they have shaped and inspired so many aspects of what makes us human
