Agency and Consciousness in Discourse Paul Thibault, 2004-12-01 In the past two decades there has been considerable interest in the ways in which subjects are positioned in discursive practice. This interest has entailed a focus on the role of language and discourse in the processes in and through which subjects are constituted in discourse. However, questions of agency and how it relates to consciousness have received less attention. This book explores the ways in which agency and consciousness are created through transactions between self and other. The book argues that it is necessary to regard body-brain interactions in the context of the social and discursive practices which act upon human bodies. These issues of agency and individuation are explored in relation to infant semiosis as well as in relation to children's symbolic play. Thibault looks at the importance of the self-referential moral conscience in relation to the interpersonal dimension of all acts of meaning-making. This conscience is also connected to the development of a self-referential viewpoint which the book argues is connected to the ecosocial semiotic systems of thinking about consciousness as a complex system operating on many different levels. The author discusses and evaluates the work of linguists, psychologists, biologists, semioticians, and sociologists such as Basil Bernstein, Mikhail Bakhtin, J. J. Gibson, M. A. K. Halliday, Walter Kauffman, Lakoff, Johnson, Jay Lemke, Jean Piaget, and Stanley Salthe to develop a new theory.

Stebbins, 2017-09-08 A range of thinkers in philosophy religion and the social sciences have argued that thanks to science technology and the organization of society the human condition has improved and will continue to do so People are becoming progressively happier and enjoying an ever improving quality of life they say mostly because they are putting their skills and reason to work The Idea of Leisure is based on the assumption that leisure also fits into the social order and it provides a singular vector by which to measure progress even though it is rarely mentioned in writings about the idea of progress Robert A Stebbins believes that leisure fosters positive development in both the individual and community Progress through free time activity may sometimes be hard to grasp because of the all too common manifestations of deviant behavior from schoolyard bullying to date rape Despite these examples the vast majority of leisure activities often have profound positive consequences for participants and society Stebbins makes a solid case for linking leisure with progress Although leisure has huge importance for humanity observations about the idea of leisure as part of the idea of progress have been sporadic It is no accident that the World Leisure Organization promotes the motto Leisure integral to social cultural and economic development Nor is it an accident that Article 24 of the United Nations Universal Declaration of Human Rights declares that Everyone has the right to rest and leisure including reasonable limitation of working hours and periodic holidays with pay For whole nations to find satisfaction and self fulfillment based on leisure would be a true sign of progress Stebbins book offers original insight into this basic human requirement **The KidsKope Peer Mentoring Programme** Penny
