The Haier Electronics Group Of China:

China's Industrial Policies and the Global Business Revolution Ling Liu, 2005-07-05 As China has blended market reforms with comprehensive industrial policies most research has focused on the national government's strategies for economic growth. However, one of the unique characteristics of industrial policy in China is that it involves government intervention at all levels from the political elite all the way down to village leaders. This book focuses on the domestic appliance industry and China's three major business groups in this area: Haier, Hisense, and Aucma. The Haier Group in particular is one of the most successful and competitive enterprises in China and is very well placed to compete globally as the Chinese economy becomes more integrated with the world trading system. This volume shows how industrial policy is formulated at the national level and implemented at the local level and examines how local government frequently intervenes in local enterprises' business strategy and management. Of practical importance, this book provides academics, business people, and policy makers with valuable insights into the development process and a concrete understanding of the challenges faced in the global business revolution by one of the world's most dynamic economies.

International Brand Management of Chinese Companies

Sandra Bell, 2008-03-29 China is certainly doing its best to keep the world mesmerized by its economic achievements. The Chinese economic growth story that began 30 years ago has in terms of dynamics and duration long since surpassed all those economic miracles which have brought Germany, Japan, and the South East Asian Tigers into the top league of the industrialized world. The rapid expansion of the Chinese economy has gone along with a fledgling reintegration of China into the global economic system. In the course of the last 30 years, China has become a major player in the global economy and today is on a trajectory towards even greater prominence. In recent years, the Chinese economy seems to have reached an important threshold line of economic development and global integration. In the first quarter century of reform and global opening, Chinese enterprises have been largely confined to a passive role in the global division of labor. Foreign enterprises, as the proprietors of greatly superior business models, production technologies, management models, as well as very competitively established brands, have been integrating Chinese players in their value chains and global operations. Lacking the necessary production technologies, products, as well as marketing knowledge to successfully address OECD consumers, Chinese enterprises have been hardly able to enter the global markets without such guidance. Now this constellation is changing.

Enterprising China Linda Yueh, 2011-07-07 This book analyzes the transformation of business development and the marketization of industry in China over the past thirty years within a complex framework of legal, political, and economic reform aims.

The Chinese Entrepreneurship Way Julia Perez-Cerezo, 2013-10-07 China is the second largest economy in the world and it stands poised to become the largest. China's geopolitical power is also developing at a stunning pace. It has been predicted that China will have more impact on the world over the next 20 years than any other country. The world order as we have known it is changing and China is becoming its leader. But contrary to the belief that China's economic miracle is

solely due to its government the reality is that it has been fuelled by its people's pent up ambition and entrepreneurial spirit. Private owned companies account for about 60 percent of the country's gross domestic product (GDP) and about 75 percent of the country's jobs. The real secret to the Chinese economy's outstanding development had most to do with the nature and attitude of the Chinese people. This book is about models of Chinese entrepreneurship. It tells the stories of fifteen women entrepreneurs but dealing with them just as entrepreneurs. They have been chosen because in today's China women are closer to the junzi ideal of Confucius. The book shows that Chinese entrepreneurs' good performance is based on principles and values shaped over the millennia. It sheds light on the approaches and rationale of the entrepreneurial paths Chinese follow. A striking feature of Chinese entrepreneurs is how they all seem to go with the flow of things. So they are not afraid to face risks or to start all over again. They do not panic when adversities arise for they know that success will always follow adversity. For Chinese entrepreneurs the world is a place where anything is possible. This makes them creative and able to persevere, willing to try what for others may seem impossible or unrealistic. They are brimming with a unique inner strength, self motivation and self control. Chinese entrepreneurs have a tremendous emotional intelligence and are experts at generating new ideas and strategies. They regard their employees and the building of an internal corporate culture as the soul of their business. For them a crisis is an opportunity to improve and learn to focus on working hard and being efficient today in order to succeed tomorrow. Chinese entrepreneurs operate in the Chinese Paradigm, a paradigm which overlaps very little with our Western paradigm. But while the Chinese are very familiar with Western modes of business, we Westerners are unaware of how they operate. This book is aimed to shine some light on this.

All the Tea in China Jeremy Haft, 2007. A reference on creating jobs and wealth by doing business with China reveals key business opportunities in a variety of sectors explaining America's competitive advantage while providing counsel on how to avoid costly mistakes within China's challenging operating environments.

China's Dream Kerry Brown, 2018-10-29. The Communist Party of China (CPC) is one of the great political forces of modern times. In charge of the destiny of a fifth of humanity it survives despite the collapse of similar systems elsewhere. Few however understand the sources of this resilience or for that matter what the Party itself stands for. China's Dream is the first book to explore the Communist Party as a cultural rather than a political entity. It looks at the narratives the Party has created to recount its own history with the moral story about national rejuvenation and renaissance that these encode. It does not shy away from the thorny issue of how a Party under Mao Zedong, one associated with self sacrifice, collectivist effort and anti individualism, came to pragmatically embrace market capitalism and a new ethics. The tensions to which this gives rise have resulted in a crisis of values which is now being addressed with very mixed results by the CPC. Drawing on his extensive knowledge of contemporary China, Kerry Brown takes us on a unique and fascinating journey through the least understood aspect of China today, not the great economic revolution in the material world but the deep cultural revolution already underway in Chinese people's daily lives.

China Newsletter ,1999

Import Safety Cary Coglianese,Adam M. Finkel,David Zaring,2011-09-28 On World Food Day in October 2008 former president Bill Clinton finally accepted decade old criticism directed at his administration s pursuit of free trade deals with little regard for food safety child labor or workers rights We all blew it including me when I was president We blew it We were wrong to believe that food was like some other product in international trade Clinton s public admission came at a time when consumers in the United States were hearing unsettling stories about contaminated food toys and medical products from China and the first real calls were being made for more regulation of imported products Import Safety comes at a moment when public interest is engaged with the subject and the government is receptive to the idea of consumer protections that were not instituted when many of the Clinton era s free trade pacts were drafted Written by leading scholars and analysts the chapters in Import Safety provide background and policy guidance on improving consumer safety in imported food pharmaceuticals medical devices and toys

and other products aimed at children Together they consider whether policymakers should approach import safety issues through better funding of traditional interventions such as regulatory oversight and product liability or whether this problem poses a different kind of governance challenge requiring wholly new methods

Business Strategy and Corporate Governance in the Chinese Consumer Electronics Sector Hailan Yang, Stephen Morgan, 2011-10-18 This book analyses how China's firms in the consumer electronics CE sector have developed their business strategy and corporate governance during the reform process The CE sector is one of China's most important and dynamic manufacturing sectors As one of the earliest market oriented sectors after 1978 its experience illustrates the adoption of the Western model of management in China This is the first book to analyse the link between business strategy corporate governance and performance of firms explicitly comparing state collective and privately owned firms This book argues that the competitive dynamics of the market are central to the survival of firms in contemporary China Focuses on the state collective and private Chinese firms in the consumer electronics sector Provides insights into the interactions among political economic and corporate factors in the China business environment that influence the strategies and performance of these firms Compares the corporate governance of these Chinese firms across different ownership forms
