The Instruction Manual For All Life:

From Dying Stars to the Birth of Life Jerry Cranford, 2011-03-01 Written in an informal manner this account tells the incredible story of the birth of an entirely new field of science called Astrobiology a field that is now investigating whether life might exist on other worlds From the discovery that other stars in our galaxy are circled by planets to the detection of single cell organisms found living on Earth in extremely hostile environments this account details the recent breakthroughs made by astronomers and earth scientists over the last few decades Based on these findings it argues that scientists now have the technology they need to move from speculating or fantasizing about extraterrestrials to possibly providing mankind with the first definitive proof that we are not alone

Life in the Universe Lewis Dartnell, 2012-12-01 Astrobiology the study of life and its existence in the universe is one of the hottest areas of scientific research Lewis Dartnell considers some of the fascinating questions facing researchers today Could life exist anywhere else in the universe What might aliens really look like Dartnell explains why Earth is uniquely suited for life and reveals our profound connection to the cosmos

The Science of Why We Exist Tim Coulson, 2024-07-02 From the Big Bang and the evolution of the genetic code to the birth of consciousness this is the extraordinary story of the chain of events that led to human life on earth Have you ever wondered why you exist What had to happen for you to be alive and conscious Scientists have come a long way in answering this question and this book describes what they have found out It also examines whether our existence was inevitable at the universe's birth 13.77 billion years ago or whether we are just incredibly lucky The book is aimed at readers who are interested in science but are not experts Written in an entertaining and accessible style the narrative begins by describing how scientists discover facts before taking the reader on a journey from the Big Bang to the creation of the human genome Covering physics astronomy chemistry earth sciences the emergence of life evolution consciousness the rise of humanity and how our personalities are moulded by genes chance and the environment the journey explains how the universe started as point of intense energy that over time in our corner of the universe resulted in our wonderful planet and in you
