The Sea Can Wash Away All Evils Kimberley Christine Patton,2007 Kimberley Patton examines the environmental crises facing the world s oceans from the perspective of religious history Much as the ancient Greeks believed and Euripides wrote that the sea can wash away all evils a wide range of cultures have sacralized the sea trusting in its power to wash away what is dangerous dirty and morally contaminating The sea makes life on land possible by keeping it pure Patton sets out to learn whether the treatment of the world s oceans by industrialized nations arises from the same faith in their infinite and regenerative qualities Indeed the sea s natural characteristics such as its vast size and depth chronic motion and chaos seeming biotic inexhaustibility and unique composition of powerful purifiers salt and water support a view of the sea as a no place capable of swallowing limitless amounts of waste And despite evidence to the contrary the idea that the oceans could be harmed by wasteful and reckless practices has been slow to take hold Patton believes that environmental scientists and ecological advocates ignore this relationship at great cost She bases her argument on three influential stories Euripides tragedy Iphigenia in Tauris an Inuit myth about the wild and angry sea spirit Sedna who lives on the ocean floor with hair dirtied by human transgression and a disturbing medieval Hindu tale of a lethal underwater mare She also studies narratives in which the sea spits back its contents sins corpses evidence of guilt long sequestered suggesting that there are limits to the ocean s vast salty heart In these stories the sea is either an agent of destruction or a giver of life yet it is also treated as a passive receptacle Combining a history of this ambivalence toward the world s oceans with a serious scientific analysis of modern marine pollution Patton writes a compelling cross disciplinary study that couldn t be more urgent or timely
