The Hospital Finality:

Relational Caring and Presence Theory in Health Care and Social Work Andries Baart,Guus

Timmerman,2024-12-18 Three decades of neoliberal efficiency thinking about caring and care systems have resulted in a greater need for relationality in healthcare and social work than ever before These support services extend beyond the giving of care and support to include the development of relationships between caregivers and their care recipients in their socio institutional contexts The culmination of over 30 years of research this book provides an extensive and critical introduction to relational working in care education and welfare It explains what relational work is and proposes a new human orientated theory beyond the simple needs provision model Demonstrating the kind of professionalism required for such work it explores why it is as important to be present with and for people especially those in precarious conditions as it is to give care This is essential reading for researchers educators quality officers policy makers students and practitioners interested in understanding the growing scholarship related to both care theory and presence theory **The Hospital** ,1897 Vol 14 41

century work of Sigmund Freud to the discomfort surrounding it still today Severely sick children and adolescents think about the consequences of their disease whether adults discuss it with them or not When adults remain silent they do a disservice to the children Dr Niethammer urges doctors to practice not in silence and denial but in open communication with ill children giving the children an opportunity to express their fears and anxieties and to cope with their disease on their own terms Dr Niethammer s compelling personal experiences combined with the latest research make this a compassionate and invaluable resource for physicians nurses social workers teachers parents for all who care for sick and dying children and adolescents
