information from the earlier manual was also omitted from the later manual as it was probably considered to be outdated. However, as that outdated information is of significant interest to today's owners and restorers, we have combined the entire data from both manuals into a single publication. Please note that wherever the earlier data had been updated, we have only included the latest update in order to prevent duplication of information. This combination manual includes alternator and generator testing and servicing instructions, spare parts illustrations, and part numbers, plus Technical Data Sheets and Service Bulletins that provide additional information due to model updates and/or electronic equipment modifications. It also includes wiring diagrams by individual model type, including A J S Ariel B S A Dayton Dunkley Excelsior Francis Barnett James Matchless Norton Piatti Raleigh mopeds and Triumph. The entire content of this publication is devoted to the operation, testing, servicing, maintenance, overhaul, and adjustment of all the major Wipac electrical components utilized by the various manufacturers listed above. Out of print and unavailable for many years, these manuals are extremely difficult to find on the secondary market, and we are pleased to be able to offer this combined reproduction as a service to all owners, restorers, and enthusiasts of 1950-1969 Wipac-equipped motorcycles, scooters, and mopeds.
