

GUIDE FOR WELDING INSPECTION AND TEST PROCEDURES CSA STANDARD W178.1-2002

The attached information is provided in the hope that Welding Inspection Organizations will find it useful in compiling the procedures referenced in Clause 8 of CSA Standard W178.1. When approved these will become the day-to-day working procedures of the organization and their implementation will be the responsibility of the Welding Inspection Supervisor.

In preparing these procedures for the product categories named in W178.1, the following factors should be considered:

The welding inspection and test procedures:

- (a) must reflect the capabilities of the inspection personnel and the facilities available and must be readily understood by the inspector.
- (b) must be presented in a form readily adaptable for shop and field use.

Two copies of the draft procedures are to be sent to the Bureau's Head Office where they will be reviewed. If only minor (or no) changes are suggested, an approved copy is returned to the company and the second copy is retained by CWB. Should major changes be recommended, certain portions might need re-writing. You would then send these revised portions to the Bureau in duplicate for final review. There are three mandatory clauses which must appear in the procedures and they are identified below:

MANDATORY CLAUSES

- i) The standard welding inspection and test procedures of this firm are prepared in accordance with Sections 7 and 8 of CSA Standard W178.1. All weld inspection and testing will be performed in conformance with this code and to any revisions.
- ii) Any welding inspection or weld testing subcontracted by this firm shall be subcontracted to firms certified to CSA Standard W178.1.
- iii) Changes or additions to the company's CWB approved inspection procedures shall be submitted to the CWB for approval before being put into practice.

1. STANDARD VISUAL WELDING INSPECTION PROCEDURES

Clause 8.2 of the Standard will serve as a general guide to indicate a minimum requirement for each product category. A suggested procedure outline is given below in Part 3.

2. STANDARD DESTRUCTIVE AND NONDESTRUCTIVE TESTING PROCEDURES

These procedures shall include all of the essential operations for each destructive and nondestructive test to be used by the organization. Clause 9 of W178.1 on equipment maintenance and calibration shall form part of these procedures. A suggested procedure outline is given below in Part 3.

3. SUGGESTED PROCEDURE OUTLINE FOR WELDING INSPECTION AND TEST PROCEDURES

3.1 Scope: The scope should identify the inspection or test method and list the product categories to which it applies. For example, it could state that "this procedure is for the visual inspection of buildings and bridges".

3.1.1 Include the three mandatory clauses noted above.
