

HOW TO STRUCTURE A POLICY ANALYSIS PAPER

IDENTIFY YOUR AUDIENCE: Your goal is to inform decision-makers, so be clear about who you are writing for – who you are trying to inform. If you are looking at national policy, is your audience a national coalition or organization or a Congressional Committee? If you are looking at state or local policy, are you addressing a state or local government body or a community organization? This will help ground your problem statement in a specific perspective.

STATEMENT OF THE PROBLEM: Describe the issue facing the above decision-makers and provide a clear understanding of how and why this is an issue for them at this particular time. This section basically states the problem from the perspective of the decision-makers.

ANALYSIS OF THE PROBLEM: In this section you will provide objective data regarding the scale and scope of the problem, who is impacted by it, how they are impacted, and refer to studies and reports about the issue. Here you are basically backing up your problem statement with facts.

SURVEY OF SOLUTIONS: This section provides a survey of two or three examples of how other jurisdictions or organizations have addressed the problem. For example, if you are investigating affordable housing solutions for an organization in East LA., this section would describe how other organizations in the country with similar circumstances successfully addressed this problem. Or, if you are investigating strategies of how public investment can improve jobs and income the City of Los Angeles, you would look at model programs from other cities.

It is often useful here to develop a matrix or chart that lays out the elements of the problem you have identified and how your solutions address those elements. This can help you build an analytical and comparative framework for the next section that consists of your recommendations.

RECOMMENDATIONS: This section consists of your recommendations for action. The recommendations should take into account the perspective and concerns of your audience as presented in your problem statement; the objective conditions of the problem; and what can be borrowed from the experience of others (from your survey of solutions). Finally, this section should include initial steps that your audience of decision-makers might take to implement your recommendations.

Explorations in Structural Analysis (RLE Social Theory) Ronald Breiger, 2014-08-21 At a time when most of the innovative techniques in empirical sociology concern themselves with networks of relations among variables such as indices of occupational prestige education and income the central theme of this volume is that there is much substantive insight and analytical leverage to be gained from a conceptualization of social structure directly as regularities in the patterning of relations among concrete entities The view adopted here is that variate distributions measure selected consequences of structural pattern of the actual connections among individuals or organizations and as such they are useful indicators of questions to be asked in analyzing social structures directly but they are neither descriptions nor analyses of the structure itself **Structural Engineering and Geomechanics - Volume 1** Sashi K. Kunnath, 2020-06-22 An understanding of dynamic effects on structures is critical to minimize losses from earthquakes and other hazards These three books provide an overview of essential topics in structural and geotechnical engineering with an additional focus on related topics in earthquake engineering to enable readers gain such an understanding One of the ultimate objectives of these books is to provide readers with insights into seismic analysis and design However in order to accomplish that objective background material on structural and geotechnical engineering is necessary Hence the first two sections of the book provide this background material followed by selected topics in earthquake engineering The material is organized into three major parts The first section covers topics in structural engineering Beginning with fundamental mechanics of materials the book includes chapters on linear and nonlinear analysis as well as topics on modeling of structures from different perspectives In

addition to traditional design of structural systems introductions to important concepts in structural reliability and structural stability are discussed Also covered are subjects of recent interest viz blast and impact effects on structures as well as the use of fiber reinforced polymer composites in structural applications Given the growing interest in urban renewal an interesting chapter on restoration of historic cities is also included The second part of the book covers topics in geotechnical engineering covering both shallow and deep foundations and issues and procedures for geotechnical modeling The final part of the book focuses on earthquake engineering with emphasis on both structures and foundations Here again the material covered includes both traditional seismic design and innovative seismic protection And more importantly concepts in modeling for seismic analysis are highlighted *Proceedings of the International Field Exploration and Development Conference 2023* Jia'en Lin, 2024-03-15 This book focuses on reservoir surveillance and management reservoir evaluation and dynamic description reservoir production stimulation and EOR ultra tight reservoir unconventional oil and gas resources technology oil and gas well production testing and geomechanics This book is a compilation of selected papers from the 13th International Field Exploration and Development Conference IFEDC 2023 The conference not only provides a platform to exchanges experience but also promotes the development of scientific research in oil gas exploration and production The main audience for the work includes reservoir engineer geological engineer enterprise managers senior engineers as well as students **NUREG/CR.** U.S. Nuclear Regulatory Commission, 1979 *Intelligent Exploration of the Web* Piotr S.
