Law Clerk Handbook Alvin B. Rubin, 1989 **Program Evaluation** Robert L. Schalock, C.V.D. Thornton, 2013-11-11

This book is written to help human service program administrators either interpret or conduct program evaluations. Our intended audience includes administrators and those students being trained for careers in human services administration. Our focus is on persons interested in assessing programs in which people work with people to improve their condition. The book's title *Program Evaluation A Field Guide for Administrators* describes how we hope you use this book as a tool. In writing the book we have attempted to meet the needs of persons who have to conduct program evaluations as well as those who must use those evaluations. Hence we have attempted to make the book user friendly. You will find for example numerous guidelines, cautions, and specific suggestions. Use the book actively. Our primary motive is to help administrators make better decisions. In fact the primary reason for program evaluation is to help program administrators make good decisions. These decisions often must balance the goals of equity or fairness in the distribution of goods and services among people in the economy, efficiency, obtaining the most output for the least resources, and political feasibility. Take for example the administrator who must decide between a new program favored by some of the program's constituents and maintaining the status quo which is favored by other constituents.

Finding Out About Richard K. Belew, 2000 Explains how to build useful tools for searching collections of text and other media.

Writing for the Web Lynda Felder, 2011-10-25 With *Writing for the Web* you'll learn everything you need to know to create effective Web content using words, pictures, and sound. Follow along as instructor and writer Lynda Felder combines easy-to-follow guidelines with photographs, lists, and tables to illustrate the key concepts behind writing nonlinear interactive stories, creating succinct and clear copy, and working compelling images, motion graphics, and sound into your content. Many books offer instruction on how to use software programs to build Web sites, podcasts, and illustrations. But only *Writing for the Web* explains when and why an author might choose an illustration over a photograph, motion graphics over text, or a slice of Beethoven's Fifth over the sound of a bubbling brook. Focusing on storytelling techniques that work best for digital media, this book describes the essential skills and tools in a Web author's toolbox, including a thorough understanding of grammar and style, a critical eye for photography, and an ear for just the right sound byte for a podcast. This clearly written guide provides a fun and practical approach to Web writing that busy students and writers will be eager to learn and explore. Uses concise, straight-to-the-point style to illustrate techniques for writing sharp and focused Web copy, coupled with compelling visuals and sound. Focuses on writing practices and guidelines with exercises and prompts developed and tested by the author. Features clear design with plenty of pictures and visual elements and a friendly and knowledgeable voice. Take your learning even further with Lynda's companion book *The Web Writer's Toolkit*, 365 prompts, collaborative exercises, games, and challenges for effective online content. For more tips, exercises, and suggestions for teachers, check out the book's Web site at www.write4web.com.
