A Roadmap for the Uptake of Cyber-Physical Systems for Facilities Management Matthew Ikuabe, Clinton Aigbavboa, Chimay J Anumba, Ayodeji Oke, 2023-06-22 This is the first book to conceptualise and develop a roadmap for the adoption of cyber physical systems CPS for facilities management FM in developing countries It is argued that effective use of CPS can help to significantly improve issues such as extended processing time poor data acquisition ineffective coverage of facility maintenance history and poor quality control within the facilities management sector Through a theoretical review of relevant technology adoption models and frameworks A Roadmap for the Uptake of Cyber Physical Systems for Facilities Management provides a clear insight into the required parameters for integrating CPS into facilities management The book will be beneficial to relevant stakeholders who face the responsibility of facilities and construction management as it contributes to the growing demand for the adoption of digital technologies in the delivery and management of built infrastructure Furthermore it serves as a solid theoretical base for researchers and academics in the quest to expand the existing borderline on construction digitalisation especially in the post occupancy stage

Construction Management Denny McGeorge, Patrick X. W. Zou, 2012-10-10 The construction industry faces continual challenges and demands due to market conditions and coercion by governments for improvements in safety quality and cost control and in the avoidance of contractual disputes To meet these challenges construction enterprises need to constantly seek new directions and business models in construction management A number of tools methods and concepts have been developed and advocated as aids to achieving improved performance but many in the industry find them confusing or are sceptical of their relevance The third edition of Construction Management New Directions brings together in a single volume detailed discussion of a range of contemporary management concepts which are

relevant to the construction industry including strategic management benchmarking reengineering partnering and alliancing enterprise risk management total safety management total quality management value management and constructability It provides a straightforward accessible and objective account of these concepts showing how they interrelate and can be used to improve the performance of the construction firm This research based text will be essential reading for industry leaders and practitioners as well as researchers postgraduate and senior undergraduate students From a review of previous editions I am in no doubt that this book will quickly become a favourite among students and practitioners alike Construction Manager
