Cross-Rhythms Keren Omry, 2011-10-20 *Cross Rhythms* investigates the literary uses and effects of blues and jazz in African American literature of the twentieth century. Texts by James Baldwin, Ralph Ellison, Langston Hughes, Zora Neale Hurston, Gayl Jones, Toni Morrison, and Ishmael Reed variously adopt or are consciously informed by a jazz aesthetic; this aesthetic becomes part of a strategy of ethnic identification and provides a medium with which to consider the legacy of trauma in African American history. These diverse writers are all thoroughly immersed in a socio-cultural context and a literary aesthetic that embodies shifting conceptions of ethnic identity across the twentieth century. The emergence of blues and jazz is likewise a crucial product of as well as catalyst for this context and in their own aesthetic explorations of notions of ethnicity these writers consciously engage with this musical milieu. By examining the highly varied manifestations of a jazz aesthetic as possibly the fundamental common denominator which links these writers, this study attempts to identify an underlying unifying principle. As the different writers write against essentializing or organic categories of race, the very fact of a shared engagement with jazz sensibilities in their work redefines the basis of African American communal identity.

Explaining Primary Science Paul Chambers, Nicholas Souter, 2024-04-03 Successful science teaching in primary schools requires a careful understanding of key scientific knowledge. This book covers all the major areas of science relevant for beginning primary school teachers, explaining key concepts from the ground up, helping trainees and recently qualified teachers develop into confident science educators. This new edition comes with an exploration of scientific misconceptions on key topics, how to take action to protect the environment through primary science teaching, a newly streamlined focus on prioritising essential primary school subject knowledge, links to national curricula for England and Scotland, videos of useful science experiments and demonstrations for the primary classroom.

The Jazz Standards Ted Gioia, 2021 An essential comprehensive guide to some of the most important jazz compositions, telling the story of more than 250 key jazz songs and providing a listening guide to more than 2000 recordings.

The Musical Novel Emily Petermann, 2014 Analyzes two groups of musical novels: novels that take music as a model for their construction, including jazz novels by Toni Morrison and Michael Ondaatje, and novels based on Bach's Goldberg Variations.

Structure, Function, and Genetics of Ribosomes Boyd Hardesty, Gisela Kramer, 2012-12-06 During the past few decades we have witnessed an era of remarkable growth in the field of molecular biology In 1950 very little was known of the chemical constitution of biological systems the manner in which information was transmitted from one organism to another or the extent to which the chemical basis of life is unified The picture today is dramatically different We have an almost bewildering variety of information detailing many different aspects of life at the molecular level These great advances have brought with them some breath taking insights into the molecular mechanisms used by nature for replicating distributing and modifying biological information We have learned a great deal about the chemical and physical nature of the macromolecular nucleic acids and proteins and the manner in which carbohydrates lipids and smaller molecules work together to provide the molecular setting of living systems It might be said that these few decades have replaced a near vacuum of information with a very large surplus It is in the context of this flood of information that this series of monographs on molecular biology has been organized The idea is to bring together in one place between the covers of one book a concise assessment of the state of the subject in a well defined field
