America from the imperial centre to its westward peripheries the governors entrusted with maintaining the royal prerogative and implementing reform Between 1748 and 1761 Halifax sought to reform the America from a motley assortment of territories into an ordered uniform asset of the imperial nation state Exploring the governors themselves reveals a complex modern network of professional and personal loyalties bound together through mutual self interest under Halifax s leadership Confronted by the Seven Years War Halifax saw his plans and followers dissipate in the face of global conflict the results of which established British America and also sowed the seeds of its eventual destruction in 1776 Long overshadowed by the acknowledged great men of his age this study restores Halifax and his interest to its rightful place as a significant influence upon major historical events illustrating his grand elaborate vision for an alternative British America that never was

inequalities of class and race The friendships that seem to have exerted an analogous level of fascination in early modern France were those that defied the assumption inherited from Aristotle and patristic sources that friendships between men and women were impossible Together the essays in *Men and Women Making Friends in Early Modern France* tell the story of the declining intelligibility of classical models of male friendship and of the rising prominence of women as potential friends The revival of Plato's friendship texts in the sixteenth century challenged Aristotle's rigid ideal of perfect friendship between men In the seventeenth century a new imperative of heterosociality opened a space for the cultivation of cross gender friendships while the spiritual friendships of the Catholic Reformation modeled relationships that transcended the gendered dynamics of galanterie *Men and Women Making Friends in Early Modern France* argues that the imaginative experimentation in friendships between men and women was a distinctive feature of early modern French culture The ten essays in this volume address friend making as a process that is creative of self and responsive to changing social and political circumstances Contributors reveal how men and women fashioned gendered selves and also circumvented gender norms through concrete friendship practices By showing that the benefits and the risks of friendship are magnified when gender roles and relations are unsettled the essays in this volume highlight the relevance of early modern friend making to friendship in the contemporary world
