Unisa Btch Mechanical Subjects Offered:

Productivity Improvement in Manufacturing SMEs Thomas Thinandavha Munyai, Boysana Lephoi Mbonyane, Charles Mbohwa, 2017-12-12 This book focuses on the application of workstudy in productivity of manufacturing SMEs locally and abroad and also explores various industrial problems which face manufacturing SMEs in developing and underdeveloped countries in the rest of the world Low productivity is currently a serious challenge facing manufacturing SMEs where these SMEs are operating below expected production output levels which makes it difficult for them to compete in the global market SMEs are the engine drivers of economic growth one of which is manufacturing The challenge is that government from various countries in developing and underdeveloped countries mandated agencies in their respective areas to ensure that there is economic progress for these SMEs but productivity remains low in the manufacturing SMEs When SMEs do not perform well productivity of manufacturing SMEs declines and unemployment increases Thus an increase in unemployment results in a drop of GDP in the country and can become a global and economic crisis This book describes a process which enables the reader to use effective knowledge that addresses problems facing the productivity of manufacturing SMEs such as work study tools and case studies and provides solutions and applications to improve the running of the manufacturing SMEs in growing their productivity

Mechanical Engineering Manchester Polytechnic. Department of Mechanical Production and Chemical Engineering, 1990

Mechanical Engineering Alan Darbyshire, Charles Gibson, 2022 Now in its fourth edition Mechanical Engineering has been revised to be in line with the technical qualifications of the new engineering apprenticeship standards at Level 3 In addition four new chapters are included that cover static and dynamic engineering systems fluid systems and additive manufacturing The text covers eight units of the BTEC L3 Advanced Manufacturing Engineering Development Technical Knowledge qualification as well as some content in the BTEC National Engineering Syllabus and BTEC L3 Aerospace and Aviation Engineering specialist qualifications It also covers some of the content in the EAL L3 Advanced Manufacturing Engineering Development Technical Knowledge qualification To enhance learning mathematical theory is backed up with numerous examples to work through There are also activities for students to complete out of the classroom that help put the theory into context Test your knowledge quizzes throughout the text enable students to test their understanding while end of unit review questions are helpful for exam revision and course work This book is ideal for students undertaking Level 3 courses in engineering although students undertaking Level 4 engineering courses will also find the content of the book useful to their studies Alan Darbyshire is a retired Further Education lecturer and experienced textbook author for Intermediate GNVQ and AVCE He drafted several of the mechanical engineering units for the BTEC National specifications Charles Gibson completed an aeronautical mechanical engineering apprenticeship and then spent 16 years in the Royal Navy maintaining military helicopters before retiring from the military in 2008 Since then he has worked in Further Education as the Head of Aeronautical Engineering at City of Bristol College where he also taught on several

programmes including BTECs in Aeronautical Engineering and Foundation Degrees In 2013 he transferred to Yeovil College where he continues to teach on engineering programmes from Level 2 to Level 5 He has also been involved in the writing of engineering technical knowledge qualifications for several engineering apprenticeship standards
