Venkatrama Calender 2015:

Port Strategy for Sustainable Development Elvira Haezendonck, 2021-03-23 Today most large port hubs include the circular economy transformation challenge together with smart digitalization and Internet of Things IoT in their strategic priorities. However, many ports do not seem to have progressed beyond incremental small scale sustainable innovations or the support of rather fragmented sustainability initiatives. The challenges are complex since ports do not only have to reconsider their own core activities but also their role in the supply chain of shippers to lift themselves out of the linear lock-in. Opportunities are also created and port authorities and businesses need to embrace circular learning and turn these projects into sustainable business models. This strategic change or refocus requires new insights into innovative governance and business frameworks, the link between strategy and commercially viable business models, systems innovation, intensified stakeholder collaboration and co-creation, altered traffic segments and hinterland focus, amongst others. These Special Issue articles address current CE transition concerns salient to port strategists and managers such as first strategic changes towards circular ports, building awareness on the importance of sustainability data and available space and how port authorities can develop circular business models.
