#### **Project-Based Learning Applied to the Language Classroom** Juliana Franco Tavares/ Louise Emma

Potter,2018-03-05 In Project Based Learning Applied to the Language Classroom the authors propose a way to develop PBL in the language classrooms taking into account all of the obstacles and specifics involved in teaching a foreign language It is about teaching English as a second or foreign language using Project Based Learning PBL We approach this combination because many people seem to think about implementing PBL in their language classes and ask questions about how to do it but feel that there aren t enough materials based on this methodology In fact most researchers and writers we have come across discuss the applications of PBL in the students mother tongue to subjects such as Math History Literature Social Studies and Science However there are few published works about the specifics of PBL in foreign language classes Besides it seems obvious to us that the main difficulty in developing projects in a second or foreign language lies exactly on the fact that communication may be hindered when students do not have enough knowledge in the target language *Enriching Your Math Curriculum* Lainie Schuster,2010 Presents practices and routines designed to support and nourish teachers as they prepare and present a meaningful year of mathematics instruction for fifth grade mathematicians Offers activities lessons and narration that can be easily adapted or adjusted to fit the particular needs of the students or the requirements of a prescribed curriculum **101 Scaffolding Techniques for Languages Teaching and Learning** Donna Lee

Tucker,2015-05-27 Let technology pave the way to Common Core success Engage your students by delving into the Common Core ELA standards with the tools they use the most As you

explore the creative road to academic success with the Common Core ELA and literacy standards you will turn your classroom into a student centered learning environment that fosters collaboration individualizes instruction and cultivates technological literacy Features include Specific recommendations for free apps and tech tools that support the Common Core Step by step guidelines to breaking down standards by grade and subject Teacher tested research supported lesson ideas and strategies Replicable resources including prewriting activities and writing templates Real life examples An individual-centered approach to visualize people's opinions and demographic information Wanda Baltzer, Theresa Hradilak, Lara Pfennigschmidt, Luc Maurice Prestin, Moritz Spranger, Simon Stadlinger, Leo Wendt, Jens Lincke, Patrick Rein, Luke Church, Robert Hirschfeld, 2021-11-05 The noble way to substantiate decisions that affect many people is to ask these people for their opinions For governments that run whole countries this means asking all citizens for their views to consider their situations and needs Organizations such as Africa s Voices Foundation who want to facilitate communication between decision makers and citizens of a country have difficulty mediating between these groups To enable understanding statements need to be summarized and visualized Accomplishing these goals in a way that does justice to the citizens voices and situations proves challenging Standard charts do not help this cause as they fail to create empathy for the people behind their graphical abstractions Furthermore these charts do not create trust in the data they are representing as there is no way to see or navigate back to the underlying code and the original data To fulfill these functions visualizations would highly benefit from interactions to explore the displayed data which standard charts often only limitedly provide To help improve the understanding of people s voices we developed and categorized 80 ideas for new visualizations new interactions and better connections between different charts which we present in this report From those ideas we implemented 10 prototypes and two systems that integrate different visualizations We show that this integration allows consistent appearance and behavior of visualizations The visualizations all share the same main concept representing each individual with a single dot To realize this idea we discuss technologies that efficiently allow the rendering of a large number of these dots With these visualizations direct interactions with representations of individuals are achievable by clicking on them or by dragging a selection around them This direct interaction is only possible with a bidirectional connection from the visualization to the data it displays We discuss different strategies for bidirectional mappings and the trade offs involved Having unified behavior across visualizations enhances exploration For our prototypes that includes grouping filtering highlighting and coloring of dots Our prototyping work was enabled by the development environment Lively4 We explain which parts of Lively4 facilitated our prototyping process Finally we evaluate our approach to domain problems and our developed visualization concepts Our work provides inspiration and a starting point for visualization development in this domain Our visualizations can improve communication between citizens and their government and motivate empathetic decisions Our approach combining low level entities to create visualizations provides value to an explorative and empathetic workflow We show that the design space for

visualizing this kind of data has a lot of potential and that it is possible to combine qualitative and quantitative approaches to data analysis
