Circular - Office of Education United States. Office of Education, 1951 *Selected List of Tests for Pupil Personnel Services* David Segel, 1949 **Assessment of Intellectual Functioning** Lewis R. Aiken, 1996-01-31 This fully updated comprehensive text examines the assessment of intellectual abilities in children and adults Chapters emphasize the rationale and techniques for measuring intellectual function in educational clinical and other organizational settings The author includes detailed descriptions of the most widely used procedures for administering scoring and interpreting individual and group intelligence tests This second edition features additional material on testing the handicapped individual and group differences in mental abilities theories and issues in the assessment of mental abilities and new tests for measuring intelligence and related abilities *The Effects of Standardized Testing* T. Kelleghan, George F. Madaus, P.W. Airasian, 2012-12-06 When George Bernard Shaw wrote his play Pygmalion he could hardly have foreseen the use of the concept of the self fulfilling prophecy in debates about standardized testing in schools Still less could he have foreseen that the validity of the concept would be examined many years later in Irish schools While the primary purpose of the experimental study reported in this book was not to investigate the Pygmalion effect it is inconceivable that a study of the effects of standardized testing conceived in the 1960s and planned and executed in the 1970s would not have been influenced by thinking about teachers expectations and the influence of test information on the formation of those expectations While our study did pay special attention to teacher expectations its scope was much wider It was planned and carried out in a much broader framework one in which we set out to examine the impact of a standardized testing program not just on teachers but also on school practices students and students parents **Speak, Listen and Learn** Tony Wood, 2015-04-10 This indispensable resource for teachers of pupils aged 7 13 years consists of a series of graduated lesson plans aimed at improving children s speaking and listening skills their self confidence and their motivation to learn ultimately leading to better school performance The scheme was developed and tested in schools during a four year period with over three thousand children and their teachers and focuses on class and group activities that are enjoyable as well as instructive All pupils are able to participate regardless of background academic standing or facility in English and the skills acquired are central to the National Curriculum for England and Wales Key Stages 2 and 3 Each lesson worksheet includes learning objectives guidance on preparation and organisation an activity guide and follow up suggestions all presented in a clear and simple manner to lead the teacher step by step through the session The materials are grouped into four levels of difficulty which combine to build a powerful range of abilities associated with persuasive and presentational speech dialogue and debate as well as developing the children s command use and articulation of English Each level consists of twelve starter lessons suitable for class based group work with sections preparing pupils for a variety of class competitions including public speaking poetry reading and debating The activities link naturally with other areas of the curriculum and topics already

being studied can easily be incorporated In a parallel controlled research project highly significant gains in a nationally standardised test of non verbal reasoning were made over a seven month period by children who followed the activities for one lesson a week compared to those who did not These were well in excess of what would be expected for their increased age Particularly high gains were made by children of lesser ability and those for whom English was an additional language The improvements recorded were later confirmed by the schools own National Curriculum assessments of progress against targets where on average the project children exceeded substantially the end of year forecasts made by their teachers
