Think Green, Take Action Daniel A. Kriesberg, 2010-08-16 This book provides an annotated bibliography of age appropriate literature and activities showing children the importance of environmental issues and teaching them the skills to take action In past years teaching children about conservation and environmental issues might have been an optional side topic to complement an earth science curriculum but in today s educational climate being green is a subject with great relevance and importance This book combines a wide variety of techniques to help students understand environmental issues and gain the skills needed to take action The children s literature and classroom activities suggested in Think Green Take Action Books and Activities for Kids are appropriate for elementary school students from grades three through seven covering three major environmental issues endangered species resource depletion and pollution After students have a grasp of the causes of these environmental problems the final chapter presents ways to take easy action that can create ripples of change across the world Educators in museums and nature centers home schooled children and their parents comprise an appropriate secondary audience for this instructive text

The Art of Science Barbara Hume, Christine Galton, 1989 The Art of Science presents an invaluable collection of effective and simple activities together with associated creative ideas to introduce and reinforce the teaching of science to infants and lower juniors Book jacket

Cognition and Instruction Sharon M. Carver, David Klahr, 2013-06-17 This volume is based on papers presented at the

30th Carnegie Mellon Symposium on Cognition This particular symposium was conceived in reference to the 1974 symposium entitled Cognition and Instruction In the 25 years since that symposium reciprocal relationships have been forged between psychology and education research and practice and laboratory and classroom learning contexts Synergistic advances in theories empirical findings and instructional practice have been facilitated by the establishment of new interdisciplinary journals teacher education courses funding initiatives and research institutes So with all of this activity where is the field of cognition and instruction How much progress has been made in 25 years What remains to be done This volume proposes and illustrates some exciting and challenging answers to these questions Chapters in this volume describe advances and challenges in four areas including development and instruction teachers and instructional strategies tools for learning from instruction and social contexts of instruction and learning Detailed analyses of tasks subjects knowledge and processes and the changes in performance over time have led to new understanding of learners representations their use of multiple strategies and the important role of metacognitive processes New methods for assessing and tracking the development and elaboration of knowledge structures and processing strategies have yielded new conceptualizations of the process of change Detailed cognitive analysis of expert teachers as well as a direct focus on enhancing teachers cognitive models of learners and use of effective instructional strategies are other areas that have seen tremendous growth and refinement in the past 25 years Similarly the strong impact of curriculum materials and activities based on a thorough cognitive analysis of the task has been extended to the use of technological tools for learning such as intelligent tutors and complex computer based instructional interfaces Both the shift to conducting a significant portion of the cognition and instruction research in real classrooms and the increased collaboration between academics and educators have brought the role of the social context to center stage
