William, PH D, 2021-03-21 Square Foot Gardening method referred to SFG a planting method that was developed by American author and TV presenter Mel Bartholomew in the 1970s. It is a method of growing plants in raised beds that is a more efficient method of growing plants. SFG rapidly gained popularity during the 1980s through Mel's first book and has since then spread throughout the world, becoming mainstream with several companies offering ready to assemble SFG gardens. SFG does not claim to be a revolutionary method and it takes just 2% of the time and space of a traditional garden. SFG makes Square Foot Gardening and when it is all grown out, it is a beautiful garden.
