

# Formal Chemistry Lab Reports

In writing laboratory reports, follow the outline listed below, making sure to write reports in a concise, yet complete and clear manner.

## Important Notes:

\*Be sure to use third person, past tense, passive voice, and proper grammar!

e.g.-the solution was prepared by...or The solutions were made using...

\*\* Don't use acronyms until you have first named the substance or technique and cited its acronym.

e.g. – *potassium acid phthalate (KHP)*

\* Typed reports should be single-spaced; handwritten reports should be done clearly in ink on a non-spiral edged paper (preferably on a carbon-copy laboratory research notebook).

## The Report

**Title:** List the title of the experiment as given at the top of the cover page of the laboratory procedure packet for that experiment.

**Objective (or Purpose):** Use a single sentence to state explicitly the specific goal of the experiment and the analytical method used.

e.g.- *The objective of this experiment was to use Beer's Law to determine the concentration of Cr(III) in an unknown.*

\* **Instrumentation** (if applies): List the manufacturer, model number, and general type(s) of all the instruments employed in the experiment.

e.g. – *Spectronic- 21 vis spectrometer*

**Procedure:** Briefly but thoroughly describe the following in a general manner:

- How solutions were obtained or prepared and used in analysis
- Amount(s) of substance(s) used
- Volume and concentrations of solutions if required by instructor
- Measurement process
