An Alternative History of Bicycles and Motorcycles Steven E. Alford,Suzanne Ferriss,2016-04-06 An Alternative History of Bicycles and Motorcycles Two Wheeled Transportation and Material Culture accounts for the nineteenth century creation and development of two wheeled vehicles both human powered and motorized Specifically the book focuses on the period from 1885 which saw the appearance simultaneously of the Safety bicycle and the Einspur the first motorcycle to 1920 while exploring implications for later bicycling and motorcycling We argue that invention of these vehicles rather than the product of gifted individuals should be seen as the consequence of a number of historical economic cultural and political forces that intersect so unpredictably that the notion of a genius inventor is reductive The common evolutionary model of development from the bicycle to the motorcycle oversimplifies both the technology and its origins Stripping the vehicles of all their material and cultural associations such a model fails to advance our understanding of the devices their creators and their riders Taking a contemporary vehicle and tracing its lineage creates a false sense of evolutionary necessity in its creation and fails to account for the many possible developmental paths that were for whatever reason abandoned By contrast our book adopts a material culture approach a form of inquiry that stresses the connections between artifacts and social relations We consider not simply the bicycle and motorcycle as material objects but focus also on the complex socio political and economic convergences that produced the materials materials that in turn themselves shaped the vehicles appearance function and adoption by riders *Zinn & the Art of Road Bike Maintenance* Lennard Zinn,2024-06-25 Lennard Zinn is the world s leading expert on bike maintenance and repair From basic repairs like how to fix a flat tire to advanced overhauls of drivetrains and brakes his illustrated step by step guide explains the tools you ll need and how to know you ve done the job right Provided by publisher *Pandemic in the Metropolis* Anastasia Loukaitou-Sideris,Alexandre M. Bayen,Giovanni Circella,R. Jayakrishnan,2022-07-22 This book brings together reports of original empirical studies which explore the impacts of the COVID 19 pandemic on urban mobility and transportation and the associated policy responses

Focusing on the California region the book draws on this local experience to formulate general lessons for other regions and metropolitan areas The book examines how the COVID 19 pandemic has had different impacts on vulnerable populations in cities It explores the pandemic s impacts on the transportation industry in particular public transit but also on other industries and economic interests that rely on transportation such as freight trucking retail and food industries and the gig economy It investigates the effect of the viral outbreak on automobile traffic and associated air quality and traffic safety as well as on alternative forms of work shopping and travel which have developed to accommodate the conditions it has forced on society With quantitative data supported with illustrations and graphs transportation professionals policymakers and students can use this book to learn about policies and strategies that may instigate positive change in urban transport in the post pandemic period U.S. Industrial Outlook United States.
