Houten, 2021-03-03 The principal aims of Urbanisation in Roman Spain and Portugal Civitates Hispaniae in the Early Empire are to provide a comprehensive reconstruction of the urban systems of the Iberian Peninsula during the Early Empire and to explain why these systems looked the way they did While some chapters focus on settlements that were cities or towns from a juridical point of view the implications of using a purely functional definition of towns are also explored Key themes include

continuities and discontinuities between pre Roman and Roman settlement patterns the geographical distribution of cities belonging to various size brackets economic relationships between self governing cities and their territories and the role of cities as nodes in road systems and maritime networks In addition it is argued that a considerable number of self governing communities in Roman Spain and Portugal were poly centric rather than based on a single urban centre The volume will be of interest to anyone working on Roman urbanism as well as those interested in the Iberian Peninsula in the Roman period

The Routledge Handbook of Archaeology and Globalization Tamar Hodos,2016-11-18 This unique collection applies globalization concepts to the discipline of archaeology using a wide range of global case studies from a group of international specialists The volume spans from as early as 10 000 cal BP to the modern era analysing the relationship between material culture complex connectivities between communities and groups and cultural change Each contributor considers globalization ideas explicitly to explore the socio cultural connectivities of the past In considering social practices shared between different historic groups and also the expression of their respective identities the papers in this volume illustrate the potential of globalization thinking to bridge the local and global in material culture analysis The Routledge Handbook of Archaeology and Globalization is the first such volume to take a world archaeology approach on a multi period basis in order to bring together the scope of evidence for the significance of material culture in the processes of globalization This work thus also provides a means to understand how material culture can be used to assess the impact of global engagement in our contemporary world As such it will appeal to archaeologists and historians as well as social science researchers interested in the origins of globalization Demography and Migration Population trajectories from the Neolithic to the Iron Age Thibault

Lachenal,Réjane Roure,Olivier Lemerrier,2020-07-30 This volume presents combined proceedings of two complementary sessions of the XVIII UISPP World Congress Paris 2018 These sessions aimed to identify demographic variations during the Neolithic and Bronze Age and to question their causes while avoiding the potential taphonomic and chronological biases affecting the documentation Sea Peoples of Northern Levant? Aegean-Style Pottery from Early Iron Age Tell Tayinat Brian Janeway,2018-07-17 Did an invasion of the Sea Peoples cause the collapse of the Late Bronze Age palace based economies of the Levant as well as of the Hittite Empire Renewed excavations at Tell Tayinat in southeast Turkey are shedding new light on the critical transitional phase of the Late Bronze Early Iron Age ca 1200 1000 B C a period that in the Northern Levant has until recently been considered a Dark Age due in large part to the few extant textual sources relating to its history However recently discovered epigraphic data from both the site and the surrounding region suggest the formation of an Early Iron Age kingdom that fused Hieroglyphic Luwian monumental script with a strong component of Aegeanizing cultural elements The capital of this putative erstwhile kingdom appears to have been located at Tell Tayinat in the Amuq Valley More specifically this formal stylistic analysis examines a distinctive painted pottery known as Late Helladic IIIC found at the site of Tayinat during several seasons of excavation The assemblage includes examples of Aegean style bowls kraters

and amphorae bearing an array of distinctive decorative features A key objective of the study distinguishes Aegean stylistic characteristics both in form and in painted motifs from those inspired by the indigenous culture Drawing on a wide range of parallels from Philistia through the Levant Anatolia the Aegean Sea the Greek Mainland and Cyprus this research begins to fill a longstanding lacuna in the Amuq Valley and attempts to correlate with major historical and cultural trends in the Northern Levant and beyond In Sea Peoples of the Northern Levant Janeway ably navigates the complex context within which these data must be historically and archaeologically situated and provides a first look at the Aegeanizing ceramics from the Tell Tayinat assemblage that is both comprehensive and invaluable For researchers and scholars working within the complex material and historical tapestry of the Late Bronze Early Iron Age transition in the eastern Mediterranean this volume is highly recommended Jeffrey P Emanuel Harvard University in American Journal of Archaeology 123 3 2019 *The Archaeology of Mediterranean Prehistory* Emma Blake,A. Journal of Anthropological Research ,2016 **The Archaeology of the Mediterranean Iron Age** Tamar Hodos,2020-09-17 The Mediterranean s Iron Age period was one of its most dynamic eras Stimulated by the movement of individuals and groups on an unprecedented scale the first half of the first millennium BCE witnesses the development of Mediterranean wide practices including related writing systems common features of urbanism and shared artistic styles and techniques alongside the evolution of wide scale trade Together these created an engaged interlinked and interactive Mediterranean We can recognise this as the Mediterranean s first truly globalising era This volume introduces students and scholars to contemporary evidence and theories surrounding the Mediterranean from the eleventh century until the end of the seventh century BCE to enable an integrated understanding of the multicultural and socially complex nature of this incredibly vibrant period *European Societies in the Bronze Age* A. F. Harding,2000-05-18 The Bronze Age roughly 2500 to 750 BC was the last fully prehistoric period in Europe and a crucial element in the formation of the Europe that emerged into history in the later first millennium BC This book focuses on the material culture remains of the period and through them provides an interpretation of the main trends in human development that occurred during this timespan It pays particular attention to the discoveries and theoretical advances of the last twenty years that have necessitated a major revision of

received opinions about many aspects of the Bronze Age Arranged thematically it reviews the evidence for a range of topics in cross cultural fashion defining which major characteristics of the period were universal and which culture and area specific The result is a comprehensive study that will be of value to specialists and students while remaining accessible to the non specialist The Archaeology of the Mediterranean Iron Age Tamar Hodos,2020 **Organizing Bronze Age**

Societies Timothy Earle,Kristian Kristiansen,2010-08-30 The Bronze Age was a formative period in European history when the organisation of landscapes settlements and economy reached a new level of complexity This book presents the first in depth comparative study of household economy and settlement in three micro regions the Mediterranean Sicily Central Europe Hungary and Northern Europe South Scandinavia The results are based on ten years of fieldwork in a similar method of documentation and scientific analyses were used in each of the regional studies making controlled comparisons possible The new evidence demonstrates how differences in settlement organisation and household economies were counterbalanced by similarities in the organised use of the landscape in an economy dominated by the herding of large flocks of sheep and cattle This book s innovative theoretical and methodological approaches will be of relevance to all researchers of landscape and settlement history **The Earlier Iron Age in Britain and the Near Continent** Colin Haselgrove,Rachel Pope,2007 Seeks to establish what we now know and do not know about Earlier Iron Age communities in Britain and their neighbours on the Continent The authors look at how communities of the Late Bronze Age transform into those of the Earlier Iron Age and how we understand the social changes of the later first millennium BC *Phoenician Amphora Production and Distribution in the Southern Levant* Elizabeth Bettles,Elizabeth A. Bettles,2003 Bettles systematic analysis of the Phoenician carinated shoulder amphora serves two purposes to examine in detail the production and distribution of one type of vessel in southern Phoenicia Tyre and Sidon when it was under Persian control and secondly to examine the socio cultural context of the amphoras as containers of wine **Old World Archaeology Newsletter** ,1988 American Journal of Archaeology and of the History of the Fine Arts ,2011 **The Archaeological Journal** ,2012 **The Antiquaries Journal** ,1921
