Revisionism and Diversification in New Religious Movements Eileen Barker, 2016-04-08 New Religious Movements tend to start their lives with a number of unequivocal statements not only of a theological nature but also about the world and appropriate behaviours for the believer Yet these apparently inalienable Truths and their interpretations frequently become revised adjusted or selectively adopted by different believers This book explores different ways in which as NRMs develop stagnate fade away or abruptly cease to exist certain orthodoxies and practices have for one reason or another been dropped or radically altered Sometimes such changes are adapted by only a section of the movement resulting in schism Of particular concern are processes that might lead to violent and or anti social behaviour As part of the Ashgate Inform series and in the spirit of the Inform Seminars this book approaches its topic from a wide range of perspectives Contributors include academics current and former members of NRMs and members of cult watching movements All the contributions are of a scholarly rather than a polemic nature and brought together by Eileen Barker the founder of Inform

The Cathars Malcolm Barber, 2014-06-17 The Cathars are one of the most famous heretical movements of the late twelfth and early thirteenth centuries They infiltrated the highest ranks of society and posed a major threat not only to the Catholic Church but also to secular authorities as well The movement was finally smashed by the crusade and the inquisitional proceedings that followed This new study is the first comprehensive history of the Cathars It addresses major topics in medieval history including heresy orthodoxy and the Crusades as well as providing a history of the social and political history of Languedoc and the rise of the Capetian dynasty A fascinating study of the development of radical religious belief and its violent suppression

Writing the Voice of Pleasure A. Callahan, 2001-11-09 The Voice of Pleasure makes a persuasive and fascinating argument that the romantic couple of Western representation is not heterosexual Nor is it homosexual With insightful new readings of landmarks of Western culture from Tristan and Yseult to Seinfeld Callahan demonstrates that the illusion of heterosexuality is created by a male artist's assumption of a feminine voice to express desire Named the troubadour effect for the first time here this tradition of male femininity in romantic writing results in a cultural model of desire best described as heterosexuality without women The most compelling aspect of the book is its attention to the effect of this paradox on women writers Illuminating her argument with striking examples from the troubadours to Toni Morrison the author shows how women writers inscribe their vagabondage a term she coins to name the consequences of the troubadour effect for women's agency as both writers and lovers

Crusaders, Cathars and the Holy Places Bernard Hamilton, 2018-12-17 First published in 1999 this volume emerged as part of the Collected Studies series and features studies authored by Bernard Hamilton over a period of twenty years all of which deal with relations between Western Europe and the neighbouring civilizations in the Eastern Mediterranean during the 12th and 13th centuries The first set examines

the kind of society which developed in the Crusader States including three essays on women and Queens and the attitude of western settlers to the Byzantine Empire eastern Christian churches and the Islamic world Further essays deal with the impact on Western Europe of Christian dualist heresy which had its roots in the Balkans and Armenia and perhaps ultimately in Persia The final group centres around the Holy Places whose liberation was the *raison d'être* of the crusade movement They examine how the Western Church administered these shrines the way in which they shaped western piety during the time of crusader rule and how the cult of the Holy Places developed in the Western Church after they had been recaptured by Islam Each article's original citation information is included along with the original page numbers and pagination

Heresy and Heretics in the Thirteenth Century Lucy J. Sackville, 2014-08-21 The first book to deal with all the principal treatments of heresy and anti heretical writings during their heyday in the thirteenth century Heresy is always relative the traces that it leaves to us are distorted and one sided In the last few decades historians have responded to these problems by developing increasingly sophisticated methodologies that help to unravel and illuminate the tangled layers from which the texts that describe heresy are built but in the process have made our reading of heresy fractured and disconnected *Heresy and Heretics* seeks to redress this by reading the different types of anti heretical writing as part of a wider connected tradition considering all the principal orthodox treatments of heresy for the first time Drawn from the mid thirteenth century a time when both medieval heresy and the church's response to it were at their zenith they describe a spectrum of material that ranges from the theological arguments of some of the greatest thinkers of the age to the homely sermons of the wandering preachers In considering the whole scope of anti heretical writing from this period it becomes apparent that far from being an artificial construct isolated from reality the church's treatment of heresy in fact had a far more complex relationship with its subject matter Dr L J Sackville teaches in the Department of History University of York
