Open Innovation Research, Management And Practice Joe Tidd,2013-10-24 The concept of open innovation has become increasingly popular in the management and policy literature on technology and innovation However despite the large volume of empirical work many of the prescriptions being proposed are fairly general and not specific to particular contexts and contingencies The proponents of open innovation are universally positive but research suggests that the specific mechanisms and outcomes of open innovation models are very sensitive to context and contingency This is not surprising because the open or closed nature of innovation is historically contingent and does not entail a simple shift from closed to open as often suggested in the literature Research has shown that patterns of innovation differ fundamentally by sector firm and strategy Therefore there is a need to examine the mechanisms that help to generate successful open innovation In this book the authors contribute to a shift in the debate from potentially misleading general prescriptions and provide conceptual and empirical insights into the precise mechanisms and potential limitations of open innovation research and management practice

Sawhney, 2017 After it introduced the extremely successful Droid smartphone into the market in 2009 Motorola quickly moved to develop the next generation Droid 2 before the next wave of smartphones including the rumored iPhone 4 flooded the market The development process was moving smoothly for the company when Verizon its biggest partner dropped a bombshell It wasn't happy with the mechanical camera button on the Droid 2 citing customer feedback and wanted it to be changed to a software button like the iPhone's This request immediately placed Motorola in the proverbial horns of a dilemma On the one hand it couldn't brush away the request of its biggest and most important partner On the other hand changing the camera button now would mean delaying the Droid 2's entry into the market Should the Droid 2 team remove the camera's hardware button in favor of a software button per Verizon's request or not John Smith the product manager leads the cross functional Droid 2 team The case setting is an emergency war room meeting to address this critical issue just weeks prior to launch John's objective is to obtain the salient facts and opinions of team members quickly so he can make an informed recommendation to his boss by the end of the day He is concerned that this last minute request for a design change will not only threaten to delay the launch which would have significant financial implications but could potentially create deep fissures in a hitherto effective team that had been running like a well oiled machine The case puts students in a situation that simulates a real world discussion and allows them to experience what it is like as a product manager to orchestrate a meeting with cross functional teams that have conflicting priorities and agendas It illustrates the challenges a product manager faces while striving to make important decisions with little or no direct authority over the various teams After reading and analyzing this case students will be able to Experience the dynamics of cross functional teams in product management Practice running effective and productive meetings Practice bringing together various personalities and points of view Understand the importance of setting goals and clear expectations Internalize the importance of building relationships and influencing teams even when you do not have direct authority **Motorola's Droid 2** Mohanbir S.
