Verona School Environmental Science Pearson:

Managing the Classroom Environment Suzanne G. Houff, 2013-10-10 Using William Glasser's ideas as a foundation this text explores the five basic needs and their implication for classroom management. Additional management concepts and ideas are enmeshed in the developmental recommendations to provide a theoretical and researched validation for a management plan that moves away from rewards and punishments and focuses on meeting the needs of the students. By investigating the basic needs of survival, belonging, fun, freedom, and power, the reader can develop strategies that will help students self-regulate and take responsibility for their academics and actions. Scenarios are used to provide practice with classroom situations by offering possible analysis, corrective measures, and preventive measures. A theory into practice approach helps illustrate how the concepts work in an actual situation.

Handbook of Special Education James M. Kauffman, Daniel P. Hallahan, 2011-05-15 Special education is now an established part of public education in the United States by law and by custom. However, it is still widely misunderstood and continues to be dogged by controversies related to such things as categorization, grouping, assessment, placement, funding, instruction, and a variety of legal issues. The purpose of this 13-part, 57-chapter handbook is to help profile and bring greater clarity to this sprawling and growing field. To ensure consistency across the volume, chapter authors review and integrate existing research, identify strengths and weaknesses, note gaps in the literature, and discuss implications for practice and future research. Key features include Comprehensive Coverage: Fifty-seven chapters cover all aspects of special education in the United States, including cultural and international comparisons. Issues/Trends: In addition to synthesizing empirical findings and providing a critical analysis of the status and direction of current research, chapter authors discuss issues related to practice and reflect on trends in thinking. Categorical Chapters: In order to provide a comprehensive and comparative treatment of the twelve categorical chapters in section IV, chapter authors were asked to follow a consistent outline: Definition, Causal Factors, Identification, Behavioral Characteristics, Assessment, Educational Programming, and Trends and Issues. Expertise: Edited by two of the most accomplished scholars in special education, chapter authors include a carefully chosen mixture of established and rising young stars in the field. This book is an appropriate reference volume for anyone: researchers, scholars, graduate students, practitioners, policy makers, and parents interested in the state of special education today, its research base, current issues and practices, and future trends. It is also appropriate as a textbook for graduate-level courses in special education.
