of theory and its role in the field this collection makes an important contribution to scholarship in rhetorical studies and writing studies It will be valuable to scholars teachers and students interested in diverse theoretical directions in rhetoric and writing studies as well as in race gender and disability theories religious rhetorics digital rhetoric and the history of rhetoric Publication supported in part by the Texas Tech University Humanities Center Contributors Jason Barrett Fox Geoffrey Clegg Kirsti Cole Joshua Daniel Wariya Diane Davis Rebecca Disrud Bre Garrett Catherine C Gouge Debra Hawhee Matthew Heard Joshua C Hilst David G Holmes Bruce Horner William B Lalicker Jennifer Lin LeMesurier James C McDonald Timothy Oleksiak Dawn Penich Thacker J Blake Scott Victor J Vitanza Susan Wyche *The Flowering of a Tradition*

Elizabeth Tebeaux, 2016-12-05 *The Flowering of a Tradition* which describes the development of technical or practical writing in England during the seventeenth century from 1641 to 1700 follows *Emergence of a Tradition* which tracks the emergence of English technical writing from 1475 to 1640 during the English Renaissance Together the books present the emergence and development of technical writing in England from 1475 to 1700 by describing and exemplifying the main characteristics and genres of technical writing as they appeared and flowered Topics include format and page design recognition of readers needs in content and presentation plain style technical description technical writing s contribution to the development of the paragraph text and the use of technology in technical writing the history of instructions and the emergence and development of proposals and reports The two books cover the major topics that continue to form the foundation of the teaching and practice of technical writing and help define the history of practical discourse during approximately 300 years of English history The history of technical or practical writing has not yet been written and these two books fill a major deficiency in the history of English technical writing Chapters on the history of the proposal and the history of reports deal with topics never before researched The chapter on the history of the paragraph shows that paragraphs existed 300 years before composition historians have stated because technical writing has not been included in studies of the history of English discourse Even though the majority of English writing is practical writing in any era it continues to be ignored by social and literary historians Only book length studies of the type published here will fill this void Technical writing will not become a discipline unless we have a series of books providing a clear foundation that unearths its existence and shows its contribution to all of our writing today in the workplace and other nonacademic settings *Doing Research in Applied Linguistics* Jim McKinley, Heath Rose, 2016-12-08 *Doing Research in Applied Linguistics* Realities dilemmas and solutions provides insight and guidance for those undertaking research and shows the reader how to deal with the challenges of this research involving real people in real settings Featuring over twenty chapters by experienced and up and coming researchers from around the world this book outlines the steps involved in solving the problem and completing a successful and publishable project provides case studies of obstacles faced at each stage of research from preliminary planning to report writing addresses issues of validity and reliability during data collection and analysis discusses ethical issues in research dealing with
