Ancient Geopolymers in South America and Easter Island Joseph Davidovits, 2024-11-16 This book presents the study on Ancient Geopolymers in South America and Easter Island regions exploring the artificial nature of the volcanic rocks used in the construction of Easter Island's statues Contrary to the belief that the statues were carved and transported Davidovits suggests they were made on site using geopolymer technology He proposes that this knowledge came from Amerindians from the Andes specifically the Tiahuanaco region near Lake Titicaca The book is divided into two parts the first examines geopolymeric artificial stone technologies in the Andes and the second establishes a connection between these technologies and Easter Island 3 700 km away Davidovits research includes geological expeditions SEM analysis petrography and a comprehensive review of international literature It is intriguing to observe that in both cases Pumapunku Tiwanaku in the Andes and Easter Island volcanic rocks are involved which contain biological carbon These discoveries undeniably support the theory of geopolymeric artificial manufacturing challenging traditional archaeological views

States. Congress. Senate. Committee on Commerce, Science, and Transportation, 2012 *Decline and Recovery of the Island Fox* Timothy J. Coonan, Catherin A. Schwemm, David K. Garcelon, 2010-07-22 Native only to the California Channel Islands the island fox is the smallest canid in North America Populations on four of the islands were threatened to extinction in the 1990s due to human mediated predation and disease This is the first account of the natural history and ecology of the island fox illustrating both the vulnerability of island ecosystems and the efficacy of cooperative conservation measures It explains in detail the intense conservation actions required to recover fox populations such as captive breeding and reintroduction and large scale ecosystem manipulation These actions were successful due in large part to extraordinary collaboration among the scientists managers and public advocates involved in the recovery effort The book also examines the role of some aspects of island fox biology characteristic of the island syndrome in facilitating their recovery including high productivity and an apparent adaptation to periodic genetic bottlenecks

Naval Training Activities on the Island of Vieques, Puerto Rico United States. Congress. House. Committee on Armed Services. Panel to Review the Status of Navy Training Activities on the Island of Vieques, 1981 *The Study of Society (RLE Social Theory)* Kathleen Joan Heasman, 2020-07-26 In this book Dr Heasman begins by stating some central questions and answers concerning sociology and how we are to set about studying society It goes on to deal with family groupings and social differences with education and the part it plays in socialization with the meaning and the importance of social differences and with the relative importance of work and leisure and the ways in which leisure can be used It considers the effects of the change in the size of the population in the last hundred years upon social life in Britain examines the problems of social change and looks at order in society and the way it is affected by different forms and aspects of government The result is a thorough comprehensive but at all times lucid introduction to the subject

Beckman, 2013 Marine Environmental Biology and Conservation provides an introduction to the environmental and anthropogenic threats facing the world's oceans and outlines the steps that can and should be taken to protect these vital habitats It begins with a brief overview of the essentials of marine biology and oceanography necessary to understand the conservation material The book then moves through the different habitats in the marine environment such as coastal ecosystems the open ocean and the deep sea exploring the organisms that live there and what conservation dangers and solutions affect these areas

Island Ecosystems Stephen J. Walsh, Carlos F. Mena, Jill R.

Stewart, Juan Pablo Muñoz Pérez, 2023-05-10 Sustainable development is a process to improve the quality of life of people while maintaining the ability of social ecological systems to continue to provide valuable ecological services that social systems require. In the Galapagos Islands, the maintenance of amenity resources to support tourism and the quality of life of residents is explicitly linked to ecosystem goods and services, particularly the accessibility to high quality natural environments and the terrestrial and marine visitation sites that showcase iconic species. On June 26-30, 2022, the Galapagos Science Center celebrated its 10 Year Anniversary. As the crowning event of the anniversary celebration, the World Summit on Island Sustainability was held on San Cristobal Island, Galapagos Archipelago of Ecuador. The intent of the World Summit was to bring together leading experts on island ecosystems and particularly on island sustainability from across the globe to represent a diversity of perspectives, approaches, and stakeholder groups. The World Summit was an exclusive event that featured an expert convening of scholars and practitioners to address the social, terrestrial, and marine sub systems of the Galapagos Islands and other similarly challenged island ecosystems from around the globe. The World Summit attracted 150 scientists to the Galapagos Islands to discuss projects conducted for instance in the Galapagos Islands, Hawaii, Guam, French Polynesia, Chile, Australia, and the Caribbean Islands. Island vulnerability, resilience, and sustainability were examined by scholars for instance from the University of North Carolina at Chapel Hill, Universidad San Francisco de Quito, Catholic University of Chile, University of Guam, James Cook University, University of the Sunshine Coast, North Carolina State University, North Carolina Museum of Natural Sciences, California Academy of Sciences, University of San Francisco, and the University of South Alabama, as well as affiliated scientists from Exeter University, University of Edinburgh, University of Southampton, and the Galapagos National Park. The World Summit also included scholars from Rewild World, Wildlife Fund, EarthEcho, and the East West Center, Hawaii.
