Toward A Sociological Theory of Information Harold Garfinkel, Anne Rawls, 2015-11-17 In 1952 at Princeton University Harold Garfinkel developed a sociological theory of information. Other prominent theories then being worked out at Princeton including game theory neglected the social elements of information modeling a rational individual whose success depends on completeness of both reason and information. In real life these conditions are not possible and these approaches therefore have always had limited and problematic practical application. Garfinkel's sociological theory treats information as a thoroughly organized social phenomenon in a way that addresses these shortcomings comprehensively. Although famous as a sociologist of everyday life, Garfinkel focuses in this new book never before published on the concerns of large scale organization and decisionmaking. In the fifty years since Garfinkel wrote this treatise there has been no systematic treatment of the problems and issues he raises. Nor has anyone proposed a theory of information like the one he proposed. Many of the same problems that troubled theorists of information and predictable order in 1952 are still problematic today.

*Narrating Illness: Prospects and Constraints* Joanna Davidson, Yomna Saber, 2019-07-22 This volume was first published by Interdisciplinary Press in 2016. Telling the story of illness emerges from a landscape of pain, grief and loss but its therapeutic value is indubitable. This volume grapples with the potentials and limitations of such narratives as diverse cultural perceptions and realities are granted the voice to probe into those stories from literary and textual material as well as empirical, ethnographic, historical and personal bases. Some of the chapters draw upon the capacity of storytelling to heal bodies and souls whereas others provide an important corrective to this overwhelmingly optimistic portrayal by focusing on the limits of storytelling and narrative to address physical and psychic trauma. Despite the different approaches what ties these chapters together is a more focused textual and contextual analysis of the intersection between forms of storytelling and sharing the experience of illness as studied and witnessed and sometimes even lived by the authors of the volume.

*A Constraints-Led Approach to Golf Coaching* Ian Renshaw, Peter Arnott, Graeme McDowall, 2020-09-13 While the popularity of golf is coming under increased pressure it continues to hook millions of players. However the complexity of the game and the extremely high level of precision required to hit the ball consistently well means that it is a game that is difficult to even become good at let alone master. Consequently irrespective of whether the player is a weekend golfer, a club member or a tour professional the search for the key to playing good golf feeds an insatiable desire for ideas and tips to improve golf performance and bring one's handicap down. However traditional coaching with its primary focus on developing the perfect swing is not leading to a reduction in handicaps and the time is ripe for a new approach. This book aims to fill this void and is a landmark text for golf coaches and players about applying a constraints led approach (CLA) to golf coaching. In this book two golf coaches Pete Arnott and Graeme McDowall talk to Ian Renshaw to demonstrate how their practice is driven and inspired by their alignment to a CLA. A Constraints Led Approach to Golf Coaching includes case studies and examples of how constraints are manipulated to induce adaption in the technical, tactical or put in golf terms course management, physiological

and psychological development mechanisms needed to improve at golf Examples cover coaching from their work with beginners high handicappers aspirant tour players and elite players looking to make the tour
