History Textbooks and the Wars in Asia Gi-Wook Shin,Daniel C. Sneider,2011-02-08 Over the past fifteen years Northeast Asia has witnessed growing intraregional exchanges and interactions especially in the realms of culture and economy Still the region cannot escape from the burden of history This book examines the formation of historical memory in four Northeast Asian societies China Japan South Korea and Taiwan and the United States focusing on the period from the beginning of the Sino Japanese war in 1931 until the formal conclusion of the Pacific War with the San Francisco Peace Treaty of 1951 The contributors analyse the recent efforts of Korean Japanese and Chinese scholars to write a common history of Northeast Asia and question the underlying motivations for their efforts and subsequent achievements In doing so they contend that the greatest obstacle to reconciliation in Northeast Asia lies in the existence of divided and often conflicting historical memories The book argues that a more fruitful approach lies in understanding how historical memory has evolved in each country and been incorporated into respective master narratives Through uncovering the existence of different master narratives it is hoped citizens will develop a more self critical self reflective approach to their own history and that such an introspective effort has the potential to lay the foundation for greater self and mutual understanding and eventual historical reconciliation in the region This book will be essential reading

differentiation between skilled and unskilled workers often considered through a racialized lens it emerged as the primary divide between greater rights of immigration and citizenship for the former and confinement to temporary or unauthorized migrant status for the latter Through thirty one chapters this volume further evaluates the long global history of migration and it shows that despite the increased disciplinary systems the primacy of migration remains and continues to shape political economic and social landscapes around the world

World History Eric Vanhaute, 2013-07-24 World History An Introduction provides readers with the knowledge and tools

necessary to understand the global historical perspective and how it can be used to shed light on both our past and our present. A concise and original guide to the concepts, methods, debates, and contents of world history, it combines a thematic approach with a clear and ambitious focus. Each chapter traces connections with the past and the present to explore major questions in world history: How did humans evolve from an endangered species to the most successful of them all? How has nature shaped human history? How did agricultural societies push human history in a new direction? How has humankind organized itself in ever more complex administrative systems? How have we developed new religious and cultural patterns? How have the paths of The West and The Rest diverged over the last five centuries? How, at the same time, has the world become more interconnected and globalized? How is this world characterized by growing gaps in wealth, poverty, and inequality? Sharp and accessible, Eric Vanhaute's introduction to this exciting field demonstrates that world history is more of a perspective than a single, all-encompassing narrative, an instructive new way of seeing, thinking, and doing. It is an essential resource for students of history in a global context.

AUTHORS' PERSPECTIVE Authors John D. Woodbridge and Frank A. James III wrote this history of the church from the perspective that such a history is the story of the greatest movement and community the world has known, as imperfect as it still is. It's a human story of a divinely called people who want to live by a divine revelation. It's a story of how they succeeded and how they failed, and of how they are still trying to live out their calling. From the Reformation theologians in Europe to the revivalists, apologists, and Christian thinkers
