Blomeyer,2007 Provides an overview of effective online teaching and learning practices Math Exchanges Kassia Omohundro Wedekind,2011 Traditionally small group math instruction has been used as a format for reaching children who struggle to understand Math coach Kassia Omohundro Wedekind uses small group instruction as the centerpiece of her math workshop approach engaging all students in rigorous math exchanges The key characteristics of these mathematical conversations are that they are 1 short focused sessions that bring all mathematical minds together 2 responsive to the needs of the specific group of mathematicians and 3 designed for meaningful guided reflection As in reading and writing workshop students in math workshop become self directed and independent while participating in a classroom community of learners Through the math exchanges students focus on number sense and the big ideas of mathematics Teachers guide the conversations with small groups of students mediating talk and thinking as students share problem solving strategies discuss how math works and move toward more effective and efficient approaches and greater mathematical understanding Although grounded in theory and research Math Exchanges Guiding Young Mathematicians in Small Group Meetings is written for practicing teachers and answers such questions as the following How can I use a math workshop approach and follow a certain textbook or set of standards How should I form small groups How often should I meet with small groups What should I focus on in small groups How can I tell if my groups are making progress What do small group math exchanges look like sound like and feel like **Welcoming Linguistic Diversity in Early Childhood Classrooms** Edna Murphy,2011 In schools where young English language learners speak a variety of home languages welcoming them into the classroom can be very challenging for the teacher and her English speaking pupils This long awaited book written by teachers well experienced in addressing the needs of this young and vulnerable group will come as a boon to new teachers presented with a multilingual classroom for the first time

Mathematize It! [Grades 6-8] Kimberly Morrow-Leong,Sara Delano Moore,Linda M. Gojak,2020-08-21 Help students

reveal the math behind the words I don't get what I'm supposed to do. This is a common refrain from students when asked to solve word problems. Solving problems is about more than computation. Students must understand the mathematics of a situation to know what computation will lead to an appropriate solution. Many students often pluck numbers from the problem and plug them into an equation using the first operation they can think of or the last one they practiced. Students also tend to choose an operation by solely relying on key words that they believe will help them arrive at an answer without careful consideration of what the problem is actually asking of them.

Mathematize It: Going Beyond Key Words to Make Sense of Word Problems, Grades 6-8 shares a reasoning approach that helps students dig into the problem to uncover the underlying mathematics, deeply consider the problem's context, and employ strong operation sense to solve it. Through the process of mathematizing, the authors provide an explanation of a consistent method and specific instructional strategies to take the initial focus off specific numbers and computations and put it on the actions and relationships expressed in the problem. Sure to enhance teachers' own operation sense, this user-friendly resource for Grades 6-8 offers a systematic mathematizing process for students to use when solving word problems. Gives practice opportunities and dozens of problems to leverage in the classroom. Provides specific examples of questions and explorations for multiplication and division fractions and decimals, as well as operations with rational numbers. Demonstrates the use of visual representations to model problems with dozens of short videos. Includes end-of-chapter activities and reflection questions. How can you help your students understand what is happening mathematically when solving word problems?

Mathematize it Fundamentals of AAC Nerissa Hall, Jenifer Juengling-Sudkamp, Michelle L. Gutmann, Ellen R. Cohn, 2025-10-15

The second edition of **Fundamentals of AAC: A Case-Based Approach to Enhancing Communication** continues to be a course-friendly textbook designed to walk readers through the theoretical and clinical underpinnings of assessment, intervention, and consultation for individuals with complex communication needs across the lifespan. Augmentative and alternative communication (AAC) encompasses a variety of communication methods and is used by those with a wide range of speech and language impairments. With a consistent framework and descriptive case studies, as well as input from various stakeholders, readers can gain a comprehensive understanding of the needs of persons who use AAC and how to provide them with ethically and culturally considerate support. Unlike other texts on this topic, this book empowers readers to visualize AAC in action. Each chapter begins with fundamental concepts and principles, followed by a relevant case study that presents the concepts and principles in action that guide the reader through the use of clinical decision making in AAC. Every case study is designed to underscore the cultural, linguistic, and social variability inherent to the fields of AAC and communication sciences, and how each individual influences the manifestation of the AAC system. Treatment and implementation plans are intended to easily translate into a 6-8 or 13-week semester course. This textbook is divided into eight distinct sections. Section I provides an overview of AAC, no-tech, mid-tech, and high-tech AAC systems, as well as mobile technology and advancing technology. Section II discusses language

fundamentals Section III reviews AAC assessment intervention and implementation for toddlers preschoolers and school aged individuals along with goal writing and data collection Section IV covers assessment intervention and implementation for young adults and adults needing AAC Section V offers the reader detailed information and rich examples of the application of AAC for persons with developmental disabilities Section VI provides the theoretical foundation and exemplar case studies of AAC for persons with acquired disabilities Section VII details consultation and training for various stakeholders as well as tele AAC services Section VIII presents a collection of essays from various stakeholders New to the Second Edition A chapter dedicated to AAC and literacy Updated information about neuro affirming practice technology advancements like artificial intelligence and automation and implementation of AAC outside of intervention New photos and videos Updated intervention resources Report writing tools Enhanced instructor resources Key Features Overviews with key terms set the stage for each section 36 case studies with questions and visuals to clearly depict each case Boxes with practical tips and expert advice

Student Blogs Anne Davis,Ewa McGrail,2017-01-10 How do students become successful writers and excited about writing Blogging or other online writing in your classroom can build literacies in all content areas by giving students the frequent writing practice that is missing in classrooms today Students have to write to get better at writing They need to write to an authentic audience real people who are interested in what they have to say and are willing to comment back and engage in further conversation Simply put they need practice time in interactive writing How might teachers do this This book is the answer to this question The book investigates blogs as digital spaces where students can practice writing and converse with an authentic audience It focuses on idea development and gives students voice Today s students already occupy or will inhabit new online spaces in the future Schools and teachers must move forward with the students and embrace this world across the curriculum in purposeful and creative ways This will transform schools and teacher classrooms

Engaging Young Children in Mathematics Douglas H. Clements,Julie Sarama,2004 Engaging Young Children in Mathematics Standards for Early Childhood Mathematics Education brings together the combined wisdom of a diverse group of experts involved with early childhood mathematics The book originates from the landmark 2000 Conference on Standards for Pre kindergarten and Kindergarten Mathematics Education attended by representatives from almost every state developing standards for young children s mathematics federal government officials mathematicians mathematics educators researchers from mathematics education early childhood education and psychology curriculum developers teachers policymakers and professionals from organizations such as the National Conference of Teachers of Mathematics and the National Association for the Education of Young Children The main goal of the Conference was to work collectively to help those responsible for framing and implementing early childhood mathematics standards Although it has its roots in the Conference the expanded scope of the standards and recommendations covered in this book includes the full range of kindergarten to grade 2 The volume is organized into two main parts and an online appendix <http://www.gse.buffalo.edu/org>

Hispanic New York Claudio Iván Remeseira, 2010 Over the past few decades a wave of immigration has turned New York into a microcosm of the Americas and enhanced its role as the crossroads of the English and Spanish speaking worlds Yet far from being an alien group within a mainstream and supposedly pure Anglo America people referred to as Hispanics or Latinos have been part and parcel of New York since the beginning of the city's history They represent what Walt Whitman once celebrated as the Spanish element of our nationality Hispanic New York is the first anthology to offer a comprehensive view of this multifaceted heritage Combining familiar materials with other selections that are either out of print or not easily accessible Claudio Iván Remeseira makes a compelling case for New York as a paradigm of the country's Latinoization His anthology mixes primary sources with scholarly and journalistic essays on history demography racial and ethnic studies music art history literature linguistics and religion and the authors range from historical figures such as José Martí Bernardo Vega or Whitman himself to contemporary writers such as Paul Berman Ed Morales Virginia Sánchez Korrol Roberto Suro and Ana Celia Zentella This unique volume treats the reader to both the New York and the American experience as reflected and transformed by its Hispanic and Latino components
