Peter L. Berger on Religion Titus Hjelm, 2024-04-30 Peter L Berger on Religion provides an overview and critical assessment of the work of one of the most influential sociologists of the 20th century Situating Berger's writings on religion and secularisation in the broader framework of social constructionism the book argues that neither he nor the research influenced by him consistently followed the constructionist paradigm This assessment is informed by a close examination of *The Sacred Canopy* 1967 in particular The volume also offers a Berger inspired constructionist framework for the study of religion This book is an excellent resource for students and researchers interested in the intersection of religion and social theory

Design Thinking Research Hasso Plattner, Christoph Meinel, Larry Leifer, 2014-07-16 Design thinking as a user centric innovation method has become more and more widespread during the past years An increasing number of people and institutions have experienced its innovative power While at the same time the demand has grown for a deep evidence based understanding of the way design thinking functions This challenge is addressed by the Design Thinking Research Program between Stanford University Palo Alto USA and Hasso Plattner Institute Potsdam Germany Summarizing the outcomes of the 5th program year this book imparts the scientific findings gained by the researchers through their investigations experiments and studies The method of design thinking works when applied with diligence and insight With this book and the underlying research projects we aim to understand the innovation process of design thinking and the people behind it The contributions ultimately center on the issue of building innovators The focus of the investigation is on what people are doing and thinking when engaged in creative design innovation and how their innovation work can be

supported Therefore within three topic areas various frameworks methodologies mind sets systems and tools are explored and further developed The book begins with an assessment of crucial factors for innovators such as empathy and creativity the second part addresses the improvement of team collaboration and finally we turn to specific tools and approaches which ensure information transfer during the design process All in all the contributions shed light and show deeper insights how to support the work of design teams in order to systematically and successfully develop innovations and design progressive solutions for tomorrow

Re-Thinking Economics Asimina Christoforou, Michael Lainé, 2014-05-30 Once again unfettered capitalism has failed Promises for global prosperity and peace have given way to a world of deep recession social upheaval and political instability Once again mainstream economics has proved its inadequacy Despite its technical rigour and mathematical virtuosity it failed dramatically to respond to the current crisis Why is this so Mainstream economics turns a blind eye to society By assumption it maims its analyses by wiping away what makes us what we are There is pressing need for a critical discussion and new ideas We therefore turn to the insightful and stimulating work of Pierre Bourdieu Arguably one of the major sociologists ever he was also a major economist Yet his works on the economy have received only scant attention especially from economists be they mainstream or heterodox Bourdieu helps to take a broader view and enrich our scientific imagination By including dimensions of power intuitive behaviour and social structures within the scope of his analysis he provides for an alternative foundation of economics based on an integrated interdisciplinary theory For the first time this volume fills this gap in economics by featuring state of the art research and experts from different social science disciplines This book constitutes a first step and hopes to become a milestone The book offers an innovative outlook and a unique source for social scientists of all fields particularly economists and sociologists who wish to engage in the study of Bourdieu and his economics with a view to developing a more pertinent theory It will also constitute a useful reference for university students and administrators who would like to explore the economy from a Bourdieusian perspective

Military Design Thinking Aaron P. Jackson, 2024-09-30 This book examines the newly emergent field of military design thinking how it has been developed inside and outside of military doctrine and the paradigms that underlie its key thinkers and methodologies From the emergence of its initial methodologies in the late 1990s military design thinking's development rapidly accelerated in the mid 2000s in response to perceived failures of existing military doctrine and practice to adapt to the wars of the early 21st century To establish a foundation for exploring the significance of the challenge military design thinking presented to dominant approaches to warfare the early chapters in the book examine the ontology and epistemology of military doctrine which is defined as a written expression of a military's institutional belief system regarding how to wage war They also explain how attempts to incorporate military design thinking into doctrine ultimately led to its assimilation into this belief system requiring military design thinkers to continue to explore and develop the field outside of doctrine Since the mid 2010s non doctrinal military design methodologies have become increasingly prominent within several Western militaries including the US Canada UK Australia and several European militaries Later chapters offer an exploration of the paradigms underlying non doctrinal as well as doctrinal design methodologies This book highlights how the field has evolved shows how military design thinking differs from its civilian equivalents developed in fields such as commerce and business management and discusses how it may evolve in the near future This book will be of much interest to students of military studies security studies and international relations as well as to military professionals Culturematic Grant David McCracken, 2012 Welcome to Culturematic How Reality TV John Cheever a Pie Lab Julia Child Fantasy Football Burning Man the Ford Fiesta Movement Rube Goldberg NFL Films Wordle Two and a Half Men a 10 000 Year Symphony and ROFLCom Memes Will Help You Create and Execute Breakthrough Ideas A Culturematic is a little machine for making culture It's an ingenuity engine Once wound up and released the Culturematic acts as a probe into the often alien world of contemporary culture to test the atmosphere to see what life it can sustain to see who responds and how Culturematics start small but can scale up ferociously bootstrapping themselves as they go Because they are so inexpensive we can afford to fire off a multitude of Culturematics simultaneously This is evolutionary strategy iterative innovation and rapid prototyping all at once Culturematics are fast cheap and out of control Perhaps as important they fail early and often They are the perfect antidote to a world where we cannot guess what's coming next In Culturematic anthropologist Grant McCracken describes these little machines and helps the reader master them Examples are drawn from NFL Films Twitter the Apple Genius Bar Starbucks
