Trumpet Tyro Tonalization Studies Eddie Lewis, 2019-11-06 Tonalization Studies come from a system of scale exercises that make it easier for students to learn the keys as opposed to just learning finger patterns for scales. The scale exercises are setup in a way that encourage the students to think in the keys often to the point that they can self-correct when they make mistakes. The benefits of the Tonalization Studies include better sight-reading, transposition, improvisation, intonation, finger technique, tone, and range. The Tyro Tonalization studies are specifically for students with a range up to the fourth space E. We call these students Tyro students, and it is the second level of our seven skill level system. This book has exercises in seven different keys: C, F, G, D, B-flat, E-flat, and A. Tonalization Studies are range-limited and work perfectly with Eddie Lewis One Range method. You can read more about building your range using similar exercises in Eddie's book titled One Range.
