Us Affairs 2015 Almanac:

The Middle East, Oil, and the U.S. National Security Policy Donald M. Snow, 2016-03-17 Three interrelated subject areas are at the heart of the current foreign and national security dilemma One is the Middle East which has been the epicenter of most U S policy activity for over a third of a century The second is energy policy particularly as it is affected by the development and exploitation of shale oil and gas reserves in the United States This is linked to the Middle East because it has been American dependence on Middle East petroleum that has created the interest the U S has in this region The third area is military manpower policy and two simultaneous wars in the new century have raised questions about the all volunteer force policy in place since 1972 It is increasingly evident that foreign and defense policy are strained and in need of fresh conceptualization The three areas identified are the most obvious examples of policy dysfunction The key area is the Middle East region As long as the United States remains heavily committed to this part of the world especially with military force and essentially because of its energy needs there will be strains on manpower resources that could force a reexamination of the all volunteer concept At the same time the reduction of U S dependence on Middle Eastern oil loosens the bonds that seem to impel American activism in the region The result could be true opportunities for a less confrontational adversary driven foreign and defense posture *Asian and Pacific Islander Americans in Congress, 1900-2017* Albin Kowalewski, 2017

Moffitt,2016-11-18 Few government programs in the United States are as controversial as those designed to help the poor From tax credits to

medical assistance the size and structure of the American safety net is an issue of constant debate These two volumes update the earlier Means Tested Transfer Programs in the United States with a discussion of the many changes in means tested government programs and the results of new research over the past decade While some programs that experienced falling outlays in the years prior to the previous volume have remained at low levels of expenditure many others have grown including Medicaid the Earned Income Tax Credit the Supplemental Nutrition Assistance Program and subsidized housing programs For each program the contributors describe its origins and goals summarize its history and current rules and discuss recipients characteristics and the types of benefits they receive This is an invaluable reference for researchers and policy makers that features detailed analyses of many of the most important transfer programs in the United States

Housing in America Marijoan Bull, Alina Gross, 2022-12-30 Housing is a fundamental need and universal part of human living that shapes our lives in profound ways that go far beyond basic sheltering Where we live can determine our self image social status health and safety quality of public services access to jobs and transportation options But the reality for many in America is that housing choices are constrained costs are unaffordable discriminatory practices remain and physical features do not align with needs We have made a national commitment to decent housing for all yet this promise remains unrealized *Housing in America* provides a broad overview of the field of housing The evolution of housing norms and policy is explored in a historical context while underscoring the human and cultural dimensions of housing program choices Specific topics covered include why housing matters housing and culture housing frameworks and political ideologies housing and opportunities housing and the economy housing discrimination housing affordability rental housing and housing and climate change Readers will gain an understanding of the basic debates within the field of housing consider the motivations and performance of various interventions and critically examine persistent patterns of racial and class inequality With short case studies primary source materials reflective exercises strong visuals and interviews with practitioners this introductory text explores improving housing choices in America

US Hegemony and the Americas Arturo Santa-Cruz, 2019-12-06 In this book Arturo Santa Cruz advances an understanding of power as a social relationship and applies it consistently to the economic realm in United States relations with other countries of the Western Hemisphere Following the academic and popular debate on the ebb and flow of US hegemony this work centers the analysis in a critical case for the exercise of US power through its economic statecraft the Americas its historical zone of influence The rationale for the regional focus is methodological if it can be shown that Washington's sway has decreased in the area since the early 1970s when the discussion about this matter started it can be safely assumed that the same has occurred in other latitudes The analysis focuses on three regions North America Central America and South America Since each region contains countries that have at times maintained very different relationships with the United States the findings contribute to a better understanding of the practice of US power in the sub region in question adding greater variability to the overall results *US Hegemony and the*

Americas Power and Economic Statecraft in International Relations is an invaluable resource for students and scholars interested in Latin American History and Politics North American Regional Integration International Relations Economic Statecraft Political Economy and Comparative Politics **Webs of Corruption** Mariya Omelicheva, Lawrence Markowitz, 2019-05-21 Counterterrorism experts and policy makers have warned of the peril posed by the links between violent extremism and organized crime especially the relationship between drug trafficking and terrorism funding Yet Central Asia the site of extensive opium trafficking sees low levels of terrorist violence Webs of Corruption is an innovative study demonstrating that terrorist and criminal activity intersect more narrowly than is widely believed and that the state plays the pivotal role in shaping those interconnections Mariya Y Omelicheva and Lawrence P Markowitz analyze the linkages between the drug trade and terrorism financing in Central Asia finding that state security services shape the nexus of trafficking and terrorism While organized crime and terrorism do intersect in parts of the region profit driven criminal organizations and politically motivated violent groups come together based on the nature of state involvement Governments in high trafficking regions are drawn into illicit economies and forge relationships with a range of nonstate violent actors such as insurgents erstwhile regime opponents and transnational groups Omelicheva and Markowitz contend that these relationships can mitigate terrorism by redirecting these actors toward other forms of violence Offering a groundbreaking combination of quantitative qualitative and geographic information systems methods to map trafficking terrorism connections on the ground Webs of Corruption provides a meticulously researched counterintuitive perspective on a potent regional security problem Prescription for the People Fran Quigley, 2017-11-15 In Prescription for the People Fran Quigley diagnoses our inability to get medicines to the people who need them and then prescribes the cure He delivers a clear and convincing argument for a complete shift in the global and U S approach to developing and providing essential medicines and a primer on how to make that change happen Globally 10 million people die each year because they are unable to pay for medicines that would save them The cost of prescription drugs is bankrupting families and putting a strain on state and federal budgets Patients desperate need for affordable medicines clashes with the core business model of the powerful pharmaceutical industry which maximizes profits whenever possible It doesn't have to be this way Patients and activists are aiming to make all essential medicines affordable by reclaiming medicines as a public good and a human right instead of a profit making commodity In this book Quigley demystifies statistics and terminology offers solutions to the problems that block universal access to medicines and provides a road map for activists wanting to make those solutions a reality Rebellion, Rascals, and Revenue Michael Keen, Joel Slemrod, 2021-04-06 An engaging and enlightening account of taxation told through lively dramatic and sometimes ludicrous stories drawn from around the world and across the ages Governments have always struggled to tax in ways that are effective and tolerably fair Sometimes they fail grotesquely as when in 1898 the British ignited a rebellion in Sierra Leone by imposing a tax on huts and in repressing it ended up burning

the very huts they intended to tax Sometimes they succeed astonishingly as when in eighteenth century Britain a cut in the tax on tea massively increased revenue In this entertaining book two leading authorities on taxation Michael Keen and Joel Slemrod provide a fascinating and informative tour through these and many other episodes in tax history both preposterous and dramatic from the plundering described by Herodotus and an Incan tax payable in lice to the misremembered Boston Tea Party and the scandals of the Panama Papers Along the way readers meet a colorful cast of tax rascals and even a few tax heroes While it is hard to fathom the inspiration behind such taxes as one on ships that tended to make them sink Keen and Slemrod show that yesterday s tax systems have more in common with ours than we may think Georgian England s window tax now seems quaint but was an ingenious way of judging wealth unobtrusively And Tsar Peter the Great s tax on beards aimed to induce the nobility to shave much like today s carbon taxes aim to slow global warming Rebellion Rascals and Revenue is a surprising and one of a kind account of how history illuminates the perennial challenges and timeless principles of taxation and how the past holds clues to solving the tax problems of today

Institutional Logics within Faith-Based Aid Nina G. Kurlberg, 2024-07-19 This book investigates what faith means in the actual day to day practice of faith based NGOs working in the development humanitarian and advocacy sectors Faith based organisations play an extremely prominent role in international aid and development operating within the same sphere as organisations without an explicit religious affiliation This book uses the case study of a UK based Christian faith based organisation to develop an analytic tool using institutional logics Through exploration of how various institutional logics are manifested and negotiated across organisational practice the book describes how the telos or objective of the corporate logic to sustain the organisation interacts with the telos of the religious logic namely to worship God The book demonstrates that since organisational practices must ultimately work to sustain the organisation at the organisational level faith is restricted to certain spaces and forms while at the individual level faith is dominant and active Bringing a fresh perspective to discussions of religion and development by highlighting how faith influences development at the organisational level this book will be an important read for researchers working on global development

Catalogue of the Public Documents of the ... Congress and of All Departments of the Government of the United States for the Period from ... to ..., Water, Security and U.S. Foreign Policy David Reed, 2017-06-26 Provides an analytical framework to help policy makers interpret the potential impacts and significance of drought and weather extremes as they intersect with other development challenges and difficult developmental trade offs

Accreditation on the Edge Susan D. Phillips, Kevin Kinser, 2018-06-01 A behind the scenes look at how college and university accreditation affects your education and the value of your degree Accreditation is essential to colleges and universities Without it they are unable to participate in federal student aid programs or confer legitimate degrees In Accreditation on the Edge Susan D Phillips and Kevin Kinser bring together the expertise of different stakeholders to illustrate the complexities of the accreditation system and to map the critical issues that must be navigated going forward

Accreditation can be seen both as an invaluable resource and as a barrier to needed reform. Presenting an array of different perspectives from accreditors and institutions to policymakers and consumers, the book offers nuanced views on accreditation's importance to higher education and on the potential impact of proposed reforms. The contributors reveal that accreditation is currently on the edge of a policy precipice as the needs of higher education and the interests of the many stakeholders may well outstrip its ability to perform. But they argue accreditation is also on the cutting edge of the transformation of higher education in the twenty-first century. Intended for policymakers, accreditors, institutional leaders, and scholars in higher education, *Accreditation on the Edge* offers a comprehensive analysis of the critical issues that accreditation reform needs to address if it is to serve the future of a fast-changing higher education environment.
